Introduce the Problem

The problem of justice / injustice is a major problem in a society. This problem appeared at all levels of development and existence, it is managed in one society. This problem appears in the field of state

administration, in the parliament, in the court, the prosecutor's office, the police, all kinds of state institutions, municipal institutions. This problem, when it is huge, destroys a society.

After a comprehensive and complete analysis of the situation, laws, law enforcement, by all participants - ministers, prime ministers, judges, prosecutors, investigators, government and other officials, police officers came to the creation of this theory of the degree of injustice. Justice in a society.

MORALITY AND JUDGES

The law is accepted as an instrument for control and management of society, of public relations. So the decision and the right cannot be left only in the hands of the judge, provided that he is given unlimited opportunities - to break the law, to legalize theft, of companies, factories, tools, equipment, to terminate cases. who are from the mafia and who have broken the law to the detriment of the victim.

Morality is the distinction between intentions, decisions, and actions against those that are good and right and those that are wrong and bad. Morality is an essential part of the standards and principles that are derived from the guild's code of ethics.

Morality is synonymous with honesty, honesty, diligence, kindness, and righteousness.

However, the moral norms and principles of the judge are uniform, although there are different moral systems.

For the judge and the prosecutor, they are unique and irrevocable.

Immorality is the other side of morality.

After the law, morality is the second source of law in countries that have adopted the continental legal system. If such a morality with the corresponding qualities is missing, then there is no right and the law is not realized, is not realized, is not fulfilled.

Ethics, on the other hand, is a branch of philosophy that deals with moral issues. Ethics includes and encompasses the moral principles of a society, culture, person, group.

Morality is limited as a system of duty, obligation, principles of conduct, diligence.

Organization, society, group, which represent a standard for human behavior in all situations - group, family, society.

For society, the actions of judges and prosecutors require their moral principles and ethical norms to correspond to the greater responsibility they fulfill, because they are an instrument of justice in society.

Four categories of value systems must be distinguished:

- Personal value system

- Spiritual value system public values
- Career value system
- Family value system
- Cultural value system
- Social value system

Only some social value systems materialize in the form of legal codes and / or laws.

Therefore, even if a member of a group expresses and imposes a value that is in conflict with the value system of the group, certain bodies in the group may encourage or accordingly sanction this discrepancy. Our judiciary lacks such a system of control and sanction entirely. On the contrary, the system of control bodies such as the SJC and the SJC inspectorate actually stimulate the non-compliance, violation, disrespect of the law by judges and prosecutors.

The Law and Morals in the Judicial System

According to the Constitution, Art. 4 The Republic of Bulgaria is a state governed by the rule of law and is governed by the Constitution and the laws of the country and "guarantees the rights of the individual".

According to Art. 117/1 / the judiciary protects the rights and legitimate interests of the person.

According to Art. 124 of the Constitution the obligations of the judges, including those of the Supreme Court of Cassation, who exercise supreme judicial supervision for accurate and equal application of the laws by all courts.

The individual rights of all people, including their legitimate interests, are also guaranteed.

However, this book proves the exact opposite - it is the people of the law who do not obey the Constitution, do not obey the laws, do not obey the laws, do not follow the laws, write to each other what their country is interested in.

All this applies to representatives of the judiciary such as judges, prosecutors, then statesmen, administration and others.

In this book we will show the violation of laws, morals, disrespect for the rights of judges and prosecutors in favor of people close to the mafia.

Why doesn't the Supreme Court of Cassation strictly and precisely perform its control and supervisory functions - to review cases upon appeal and to annul illegal, unfounded, unprivileged, court decisions in violation of the laws of this country, in gross violation of the laws by judges of -lower instances,

Very often, what is already written in the Zion Protocols - the purpose of the mafia to not allow cassation appeal and to disappear the cassation appeal?

What are the judges of the Supreme Court of Cassation doing in support of these decisions of the ZIONISTS in the ZION protocols of a hundred years ago - that Article 280 of the Civil Procedure Code has not been complied with, they return the appeals and do not allow cassation appeals.

JUSTICE, ETHICS IN LAW

In the EGYPTIAN "Guide to Pharaoh Mericure" around 2100 BC it is written: The ruler must be just and support the weak.

In China, Confucius 551-479 BC. He says: that people should treat each other "as relatives" and follow the golden rule: "Do not do to others what you do not want to happen to you!"

Socrates 470-399 BC thinks the same way. According to Plato, justice is "the best thing to be loved by anyone who wants to be happy, both for himself and for the consequences for others."

Aristotle describes justice as the supreme virtue. He distinguishes between the two types of justice: distributive and compensatory.

He states: inequality is a source of discontent and ferment.

Justice according to Greek philosophers and "cardinal virtue".

Cicero 106-43 BC. He argues that justice should be understood as a principle of society.

The law is the principles and foundations of the philosophy of our existence.

Only in a legal society can there be a development of the creative, social, life, personal potential.

Every area of our lives is regulated by law.

Without law there can be no social life.

Zecons without morality are meaningless.

Moral and ethical norms and values are the laws above the cassocks of a society.

So it is important that morality, ethics in law does not disappear. Because if ethics and morality

disappear, everything human disappears and there can be no society of people.

The law seeks to maintain a society in order, development, real existence, and the instinct that maintains a society and its life are legal. Justice is an ethical term. Only in Hammurabi's laws was morality combined in the laws.

In reality, values must be the main existing element of the laws.

Today, the meaning and values of values are not given at all, the lack of values and ethics, of moral and ethical values, in the laws leads to chaos in the system, in the laws, in law enforcement and among professional ethics among judges, prosecutors, lawyers, jurists.

The unethical behavior of lawyers, judges, prosecutors, lawyers, lawyers violates the dignity of the law. Judges, prosecutors must work for the truth to prevail because the truth is:

- For the benefit of the whole society and all citizens
- It would be wrong and fateful to replace truth with falsehood and deception.

When justice obeys the interests, the currency, then the essence of the law and the laws that make up the system is lost.

Law, moral principles - moral and ethical principles, justice, regulate the behavior of citizens in a society.

Ethical norms represent the minimum required bases and principles of law.

Justice today in the judicial system in Bulgaria is associated with the interests and who will pay how much to get with "justice" legally dressed in a court decision based on their personal interests dressed and paid with money.

When the right, the law, the justice is violated, then there is chaos in a society, lack of justice, honesty, conscience, honor, dignity.

Justice disputes Kant surpasses the phase of individual virtue and becomes the "formal principle of the possibility of legal status among people."

Marx dreams of a society in which the rule is valid: "Everyone according to his abilities, everyone according to his needs +.

However, if a system is mafiaized as a structure, functions, life, then this principle is only an empty system without content and essence.

Nietzsche 1844-1900 marked the beginning of skepticism, negativism, and moral criticism.

According to the American philosopher John Rawls 1921-2002, public wealth is created by all citizens and this is the reason why everyone should share in it. - The "principle of differentiation".

According to Aristotle, the highest virtue is justice.

Theory of the Degree of Justice / Injustice - Lag of Justice

- Injustice at global, national, religious, level,
- When the degree of injustice reaches a critical point - a lag of injustice - the first lag, the country or people concerned, or the relevant decision of a judge is against the law and is evidence of mafia and corruption perish and disappear.
- Corruption violates every law and does not bear any responsibility.
- The degree of injustice is directly dependent on the degree of corruption.
- Degradation of legal consciousness.
- Non-compliance with the law becomes a legal and moral norm in a country. In the United States, for example, this was evidenced by judges' decisions regarding election irregularities in the United States 2020.
- The norm is the criminal model of consciousness.
- Vices become virtues, virtues the object of ridicule and mockery.
- Demographic restructuring.
- Growing inefficiency of social functions
- the growth of impoverishment

Degree of Injustice/Justice - depends on the degree of MAFIOTISM in a society, the degree of corruption among law enforcement agencies and those involved in passing laws, the degree of trust of civil society in all participants in government - court, state prosecutor's office, how and whether judges and prosecutors obey the law, enforce the law, enforce the law, fail to enforce, break the law prosecutor's office, state, municipalities.

The degree of democracization of a society depends on the respective DEGREE OF UNJUSTICE / JUSTICE.

Formula Justice / Injustice:

Justice / Injustice = Power + Influence + Relationships + Interests + MONEY / AND + Mafia structure / internal or external / + Monopoly rights / rights + laws / rules / practices / procedures + possibility to make an alternative decision - Obligation - Responsibility - morality ethics - observance / application / implementation of the law by judges / prosecutors / statesmen - Control / Sanctions -

- Degree Of The Mafia

There is a very rapid improvement in the financial situation of judges and prosecutors close to the government and the mafia. This only happens in three to four years. Judges and prosecutors buy homes with bank loans, just to cover up their extra income as judges - mostly unproven. The proof of the existence of corrupt practices and the receipt of bribes from judges is the fact that in just two or three years judges and prosecutors repay the loans taken by banking institutions for the purchase of their apartments. An analysis of income proves that it is practically impossible with their income as judges or prosecutors to pay their mortgages to banking institutions in just two or three years.

The struggle for who to become a judge or prosecutor in Bulgaria is growing in size that is not observed in any profession in Bulgaria. On the contrary, in Western countries, young people prefer to gain experience and become lawyers, and only after solving their material needs do they turn to the judicial profession. It is even a concrete fact that judges in the Western countries become persons with many years of experience as lawyers and at the age of 40-50.

There are cases of acquiring property for millions of levs as prosecutor Balev - a house worth a million levs, judges from the Supreme Court of Cassation, the Sofia City Court, criminal judges in just two or three years acquire studios for 130,000 euros, then become chairmen of the Specialized Courts - where corruption and the mafia in the country need to be investigated, not just criminal groups.

Judicial practice is that: According to a survey, up to 89 percent of cases are bought. There are cases when the judge himself demands money from the parties. And which party gave more money in favor of that country, the relevant decision is made.

According to a study, judges want bribes as follows:

- 28% in person (
- 33% of relatives and relatives
- 19% through other magistrates
- 29% through forging
- Only 2% no answer.

It is a common practice for a magistrate in court to have a relative lawyer through whom the bribery is negotiated.

It is also a common corrupt practice that whole families are judges in the courts. For example, Judges NEchevi - a family member in the Sofia City Court, Judge Valkov and - a judge in the Sofia City Court, his wife a judge in the SRS

Judges in the Supreme Court of Cassation - families, relatives

An element of the judiciary is corruption.

Among prosecutors, 33% told a lawyer openly about informal talks to clarify the amount of the bribe.

Judicial officers sought 43% seeking benefits with the help of lawyers.

In 78% of cases, lawyers received hints of money and services.

99% of the lawyers are aware of the schemes with the mechanisms, the ways of the corrupt practice.

In examinations and anonymous examinations, how many and in what way and how often do judges take bribes, regardless of the amount and type of results:

- Very often - 13%
- Often - 16.8%
- Not very often - 13.2%
- Rarely - 16.4%
- Never - 3%
- The practice of offering high-value cracks - or a gift.

The corrupt practice of judges in cases filed against Banking institutions, insurance companies, financial companies offering fast loans - corruption is almost 99.9%. Decisions are made in violation of practical directives of the European Commission,

There is protection for judges at all levels in cases brought against Baku and financial institutions

There is protection of judges at all levels in cases filed against actions of persons from the Ministry of Interior, various state institutions

There are courts that decide professionally on cases filed against the Council of Ministers, ministries, the National Revenue Agency and other institutions - the Administrative Courts.

The chairmen of the administrative courts are appointed by the protections of the executive power - the prime minister. The former chairman of the Supreme Administrative Court G. Kolev is close to the Prime Minister of the Republic of Bulgaria - Boyko Borissov.

Corruption practices in the courts: deliberate distribution of judges in court cases.

Examples of high-level corruption - Deputy Chairman of the Supreme Court of Cassation Vlahov issued an order appointing judges to hear cases without using the random distribution of court cases.

Postponement of Cases

Violation of Laws in court cases in favor of the MAFIA and persons and companies belonging to the mafia.

The Practice to issue insane acts in violation of any laws.

PRACTICE of judges belonging to the mafia is to issue such acts with such arguments and motives, completely insane, using the veiling of motives, meaningless philologization of legal norms, creation of PERSONAL CPC by judges - in violation of CPC.

Procedures for Legalization of Mafia Orders in Court and Prosecutor's Office, Country

The procedure by which the relevant order from the mafia for theft of property, factory, company, etc. is legalized is the following:

- In case of a lawsuit - through the court. In the first instance, a decision is made in favor of the contract, even if it is absurd, a super-petitum - the legal grounds are changed, indisputable evidence is not treated, indisputable evidence is treated deliberately, indisputable evidence is not treated at all, false testimony is treated indications. The relevant decision is upheld at second instance. The decision of the second instance is upheld at the third instance - the Supreme Court of Cassation. Everything is legal.
- Upon a complaint to the prosecutor's office. At first instance, the prosecutor's office does not even consider evidence at all, but writes a link decree for refusal of formation, although there is indisputable evidence of fraud, theft, possession on a particularly large scale, use of documents with false content, preparation of documents with incorrect content - notarial deeds and others. It is confirmed at second instance. At the third instance, the Supreme Cassation Prosecutor's Office confirmed the second instance.
- In the country. Adoption of a law to legalize theft, crime, fraud. Last concrete example. The amnesty law on crimes committed by civil servants and others - ministers and others.

Examples of the mafia in the judiciary are some of the following: - a judge from the Sofia City Court goes to his colleague a judge from the SRS, with whom they worked in an office in the SRS and carries a civil or criminal case and states who his people are - be it the plaintiff or the defendant, - Judge of SRS instructs

a judge of SRS criminal college to bring a completely healthy person into the insane asylum, - Chairman of SRS despite the application of indisputable evidence of violations of a judge of SRS does not comply with the Judiciary Act and does not take any measures for punishment or dismissal of a guilty judge, - President of a court orders judges from the court entrusted to him to terminate cases conducted by a group of people, companies or other or the respective plaintiffs to lose them - the decision of judges who executed the order and issuing a court decision i.e. complete absurdity, - President of the Supreme Court despite the attached evidence of mafia and crimes committed by judges of his court does not take any action to fulfill its legal obligations to dismiss guilty judges, -President of the Supreme Court executes an order of the executive with the region In order for a company to lose a case for tens of millions of levs, - The President of the Supreme Court, although they attach evidence of crimes to him, how his subordinate judges "legally" steal property from their real owners and donate it to a third party for zero pennies, does not take any action. actions, -The President of a court orders a criminal judge to convict an innocent citizen, -The President of a court orders and actually commits crimes in favor of a large company, - The President of a court commits himself to losing cases against a municipality to injured plaintiffs, The President of the Court is committed to the execution of orders of the executive branch and to actually suffer damages - President of the court committed himself to banking institutions, insurance companies suffered to lose cases against the institutions, - President of the court committed a completely absurd decision of the first instance to be confirmed by judges of his second instance, -President of the Supreme Court conceals committed crimes by his subordinate judges, as they have made orders, -President of the Supreme Court conceals crimes committed by his subordinate judges ruled in favor of the mafia and a militant group against a victim of theft, -President of the Supreme Court despite his specialization in criminal law conceals crimes committed by his subordinate judges.

Justice / Injustice in the Judicial System

The monopoly on the judiciary and the maintenance of public order is the most important prerequisite for the generation of corrupt practices in the judiciary and the police.

An important factor is the inaccuracy, incompleteness, the presence of gaps in the relevant laws, regulations, procedures, deadlines, inconsistency of laws, inaccuracy of procedures, violation of procedures and deadlines in the judiciary, the feeling of impunity by magistrates, police, prosecutors, investigators.

Corruption in the judiciary and the police is the most important factor in the spread, imposition, growth of corruption throughout the public sector.

It generates a sense of impunity for corrupt officials, a sense of injustice among the oppressed, a sense of a double standard of laws for different segments and groups of people.

The Specificity of Justice / Corruption in the Judicial System

- The monopoly of knowledge and skills.
- Existence of omissions, inconsistencies between different laws.
- Failure to comply with deadlines and procedures in court proceedings.
- Personnel crisis in the judiciary. The promotion of junior judges, relatives of senior judges, prosecutors known to senior judges and prosecutors, etc.
- Crisis in the objective appointment and promotion of judges, prosecutors, investigators. There is political influence here, as well as influence from the executive branch.

- Simultaneous action of incompatible legal norms
- 7. Existence of a practical lack of responsibility and responsibility for poorly done work, for an illegal decision.
- Lack of clear rules for assessing the professional qualities of employees.

Theory of the Mafia and Mafiotism In Support of Injustice in One Society

The differences between fascism and mafia are minimal. This will be explained in the text below.

State capitalism - is a system in which the state replaces private entrepreneurs in their role as factors - capitalists.

Under state capitalism, all property and all means of production are concentrated in the hands of one capitalist - the state, which in most cases is governed by the party elite and party nomenklatura.

The value added of production is redistributed by the sole capitalist, the state. It is often called either socialist or communist.

It is often argued that the countries of the socialist bloc are neither popular nor social, and that the economic system is in fact state capitalism.

Capitalism is an economic system in which production and trade are privately owned and managed by market economy methods, which in turn follow the principles of supply and demand. The main engine in such a system and supposedly "competition".

Fascism - professes the idea of a one-party state,. Fascism believes that nations and races are in constant conflict, Fascist governments forbid and suppress criticism and opposition to themselves.

They are opponents of class conflict.

Fascism is a state government similar to that of Mussolini, which elevates the nation and the race above the individual, establishes a one-party system, promotes nationalism, imposes strict economic and social control, applies violence, censorship

Principles of Mafiotism - The New Type of Government in Private and Personal Interests Leading to Injustice

The state is governed by the Prime Minister, if the same state is a parliamentary republic, which has set up and governs each state institution - ministry, state agency, manages both the executive and the judiciary through appointments close to him, and governs the legislature. power - the parliament.

The people are a mob according to mafia. Principles of crowd management: suppressing the masses to be guided by petty passions.

Creating problems of the "crowd" - the people through taxes, high prices, high interest rates on banking services, management of free funds of middle class citizens, thus through cunning and hypocrisy suppress the greatest human virtues - openness and honesty, which according to mafia are vices,

The rule of law - where the law begins, where it ends.

Exiled force of law, "liberalized" rights ",
The right of the strong,

Intervenes and removes all existing regulations and decrees

Mafiaism puts its hand on the laws, reorganizes the institutions, what is necessary and useful is only for their goals and aspirations.

In this part we will consider the main elements, relationships of mafia theory, seen in the twenty years of experience in this field of the author. The following is the author's view of the creation of a mafia theory, its formation and consideration as a theory. Along with the main elements of the theory, specific manifestations of the mafia of specific types of employees are considered here. These manifestations have crystallized on the basis of a study by the author of over 137 cases in the judiciary, tax services, government institutions and others.

Elements of the Mafia/Mafiotismus Theory are the Following:

- Structure of the Mafia. It includes any structures that obey the mafia formula.
- Structural Subordination. This is present both in an external structure, mostly described as an organized criminal group, and in an internal structure - this is about every structure of the state power, the executive power, the legislative power, the judiciary. This is subordination chief-subordinate. Here the hierarchy is strict and the duties are performed from top to bottom, impartiality.
- Functional Subjection. This type of subordination of members, employees and others is valid both for the internal structures - the structures of the state power, the executive power, the judiciary, and for the external structures - especially in mafia structures there is a subordination. In some groups in Bulgaria there are even ranks - private, corporal, lieutenant and others, which characterize the functional subordination of the members. .
 - The structures of the mafia are: - External structure - of criminal groups, of economic groups, internal structure - state structure - executive power, judiciary.
- Connections. There are several types of connections between these structures that are part of Mafia: - Connections between internal and external structure, - Connections between internal structures, - Connections between external structures.
- Existence of mafia action - the prerequisite is the presence of a COMMAND - ORDER. The order is executed on the basis of:
 - Subordination - structural or functional
 - On mutually beneficial cooperation / external and internal / "You carry out my orders - I support you. You get a post, you get paid."
- Types of mafias: - internal judicial mafia, internal prosecutorial mafia, state mafia, external judicial mafia, external prosecutorial mafia, external state mafia.

MAFIA FORMULA

The simplest model of the mafia, which describes the factors that affect the size, type and type of the mafia is the following:

MAFIA = Power + Influence + Relationships + Interests + ORDER / AND + Mafia-structured structure / internal or external structure / + Monopoly rights / rights + laws / rules / practices / procedures + possibility to make an alternative decision - obligation - responsibility - morality / ethics.

The mafia is typical of both the public sector and the private sector. The mafia is characterized by the interaction of the private sector with the public sector. Interactions between different structures are based on connections and contacts on a close friendly or subordinate level of dependence in one structure, be it an external or internal structure of the mafia.

In the interaction between the two types of interests and representatives of the two sectors, especially in justice, there is an order, which is set by a member of the internal structure by him personally in his interest or by a member of the internal structure based on an order from an external structure. For a selfish purpose.

Mafiotized process is the interaction - the presence of an order between the members of: -external group or structure - this is actually denoted by a criminal group, external group or structure and members - representatives of internal structure - ie. state structure or a member of a state structure - be it from the executive branch or from the judiciary. All participants are interested parties.

A mafia environment is characterized by specific givens and opportunities, which are ultimately set by the laws themselves, the very powers, rights and obligations of the civil servant or a representative of the judiciary and a member - a representative of an external structure. The mafia environment is activated in the presence of an order from a member of an external structure to a member or members of an internal structure, when we talk about the mafia in the country. The mafia environment is activated when there is an order from members of one external structure for action concerning another external structure and its members, when we are talking about mafias or criminal groups. It is present when there is a possibility to choose an alternative solution, the lack of criminality and responsibility.

The mafiotized environment presupposes the presence of: -a presence of a wide choice of alternative solution,, the presence of a wide range and range of options for choosing a specific solution, -the presence of inaccuracies, omissions, shortcomings in laws, practices, procedures, characteristics, -the presence of opportunity for different interpretation, interpretation of a specific problem situation.

Mafiotized Action is present when there is an order to be executed - an order from an external structure to an internal structure, or an order to be executed

Motivation for Mafiotized Behavior is both the implementation of: -functional subordination and structural subordination, with the ultimate goal of benefit - both structural and functional as well as material and intangible benefits. The intangible benefit is an increase in the trust of the internal employee or member to a superior with the ultimate goal - at some point to ask for a promotion in the hierarchy.

The motives of the mafia behavior of an employee in the public sector - be it the executive branch or the judiciary - are rooted in the presence of dissatisfaction, desire for prosperity both at the structural level and at the functional level, as well as at the material level. These motives are supported by several conditions available to public sector employees. These are: widespread corrupt practices and mafia practices, lack of legal channels for tangible or intangible prosperity, impunity for violators, the possibility of alternative solutions, the availability of a wide range and area of solution, fear, subject to specific pressure. The motives of the interested persons depend on the area and the sphere in which the mafia action is carried out - execution of the order.

Some of the typical motives are: -realization of a profitable for each country economic operation, - realization of a profitable for each country administrative operation, - circumvention and outwitting of the bureaucratic system in the public or private sector, -realization of certain personal benefits, - avoidance of responsibility, hand washing, -use of loopholes and inaccuracies of case law and proceedings.

Mafiotized Price is a materialization of both tangible and intangible benefits expected for stakeholders. Depending on the variations of the elements of the mafia, there are different forms, spheres, scales, mechanisms, types of the mafia. Here is the connection of the mafia with corruption.

The foundation of this operating model of MAFIOTISMUS principle:

Appointed by the mafiotismus that controls a state, ministers, civil servants and others who have data and evidence of wrongdoing in their field of work, crimes in which they have passed each other and one of the mafia has helped them to pass.

These are different cases such as gross violations of tax legislation - tax evasion, concealment of profits, tax evasion, and others - ie held by the officers of the NRA and accordingly entered into force the decisions of the NRA, which

- Preparation of contracts from the eligibility of candidates and requirements of the candidates so close candidate of the party man, to win the contract.
- Preparing the procurement of the conditions, so that only Candidate Middle party man to win this contest, auction or other contract.

Mafiotismus mainly adopt such laws that they do not pursue relevant leaders of state structures, institutions and others. This is the guarantee of the mafiotismus. It creates laws to make in law violations and their crimes. To legitimize their crimes, and no problems with the justice system - the courts, prosecution, it should mafiotismus to appoint their relatives Chief Prosecutor for prosecutors at all levels and in all offices across the country. Mafiotismus appointed to positions of responsibility in the judiciary and judges loved ones to party mafia leadership positions. Of leadership positions in the courts - the final authority appointed people close to political mafia. This avoids any complaints of crimes committed by people of mafiotismus in the entire state. It is done at all levels of prosecution. Expressly legislate to not pursue committed by prosecutors and judges crimes mentioned in the constitution if Republic accepted that members not to pursue the commission of offenses by judges and prosecutors. This legitimized lawlessness, corruption, mafiotismus. In the judiciary are appointed judges to serve only orders to give a judgment in favor of our person, our company. By the court and the prosecution is actually legitimize the theft of factories, companies.

By the court and the prosecution is done so that the right people, the right companies mafia in the lists of creditors are claimants and others.

Which does not enter and is not willing to give and transfer property ownership, he is pursued by illegal means as political mafia use any structures -prokurori to raise absurd accusations that prosecutors themselves to commit crimes against civilians just to perform the contract Mafia. If the IRS can not achieve this pressure and racketeering, which lead to a positive result of the mafia, which through racketeering and extortion to perform the contract, it includes not only prosecutors to raise illegal and absurd accusations in making overt crimes .
