INTRODUCTION

1991 Prof. Momtchil Dobrev-Halachev made an experiment that discover a new fundamental power which is a part of the two powers that generate gravitation. Gravitation is not fundamental power. His fundamental powerе част от силите, които описват и управляват всички движения в космоса, движението на планети, на цели галактики.

1991 Prof. Dr. Momchil Dobrev-Halachev creates his theory of vortex fields and Cosmological

information theory. The explanation of how information and energy is transmitted on what paths, based on Momchil Dobrev-Halachev's theory of vortex fields and cosmological information theory. 1991 Prof. Momtchil Dobrev-Halachev build 4 different of construction of machines that generate free energy from the universum. One of this construction explain the truth about Prof. Newton's bucket.

Stepping on his theories Prof. Dr. Momchil Dobrev-Halachev, with the help of Prof. Mariola Garibova, 2005 they both developed the "Theory of

Universum” and related connections to the Free- energy generators, Energy-information genetics, energy-information medicine, energy-information psychology and psychiatry.

The new FORTH FUNDAMENTAL POWER DISCOVERED 1991 by a device created in 1991 by Prof. Momchil Dobrev - Halachev which proves free energy, zero point, free energy generator a one of the power that generates the gravitation as a composite of two forces, not as a fundamental force.

THE FOURTH FUNDAMENTAL FORCE discovered by Prof. Momchil Dobrev – Halachev ev THE BASIS OF THE STRUCTURE OF THE ETHER, its spatial structure which rests on the theory of vortex fields and the vortex as the main form of propagation of the ETHER and its derivative forces –

- The Fourth Fundamental Force - Basis for Zero Point Generators
- The Fourth Fundamental Force - The Basis for the Geometric Structure of Each Star System and Motion of Planes around a Star

POSTULATE Number 11 from THEORY OF THE UNIVERSE

Vortex fields exist Based on a Precisely Determined Spatial Geometric Structure of the Ether - Of Space. The Ether Has A Precisely Defined Geometric Structure, Including Vortex Fields. The LIGHT is a WORTH and spreads in a precisely defined way a vortex spiral as in ONE PART IT REPRESENTS A WAVE and in the points of zero union IT REPRESENTS A CORPUSCULE. THE STRUCTURE OF THE ETHER thus INCLUDES THE WAVE STRUCTURE OF ONE PART and the CORPUSCULE and an image.

THIS IS GENERATED BY ZERO POINT ENERGY

1991 Prof. Momchil Dobrev - Halachev development of the following experimental unit, which actually proves the availability of free energy, how it can be absorbed, used, realized.

The device is a disc that is rotated. The movement that causes rotation with an additional motor. On the disc are radii devices that measure the force of weight measurement. On one side, the device at the end of the periphery is fastened with an eraser, the other end of the weight, which measures how heavy a weight is, is attached to a ring that rotates freely around the axis of rotation of the disk. Several such devices are placed on the disk along the respective diagonals of two at respective radii. Fig 2 and F3.

When the axle is driven and the disc is rotated, it has a variable relay, which can increase the rotation of the device or decrease the angular velocity accordingly. The disc is fixed firmly to the rotary-driven axle.

After turning the disc clockwise, the weight adjustment devices of one object stretch to the periphery of the disk. This action is a result of the equilibrating force that results from the rotation of the equilibrating disc. Thus measuring the force that appears and is directed from the center of the disk - the device to the periphery. Fig 1.

As a result, the force that appears F_2 is many times greater than the force that rotates the disk F_1 . Fig 1.

As the rotation increases, this force F_2 becomes even greater. In fact, the energy obtained from the output F_2 is many times greater than the energy of the force F_1 .

CONCLUSIONS

In fact, the point of rotation of the disk is the "ZERO POINT", which creates and causes the force F_2 to occur. This system can be controlled simply and efficiently, giving the output energy - in this case F_2 is many times higher than F_1 / based on the Prof. Momtchil Dobrev's formula /

In reality, this system is a system of free energy generation.

This principle of action can also be used in other systems related to electric field and electromagnetic field and magnets respectively.

This principle is universal in the Theory of the Universe, the basic principles of which will be described later in the article.

The force F_2 is always perpendicular to F_1 .

The power F_2 moves on по траектории които почиват на формулата включваща числото фи, пи и При усилване на силата Φ_2 кривата става по-полегата с и по малък ъгъл към

Prof. Momchil Dobrev - Halachev Field – the forth Power in the Universum. The gravitation is not fundamental power in the Universe. The gravitation is a result of two fundamental powers discovered by Prof. Momtchil Dobrev-Halachev one of which is described in this paper.

This is a special field - the field of Prof. Momchil Dobrev - Halachev, it is a repulsive field.

The strength of this field is greater than the transmitting rotational force and grows exponentially.

This field extends across the entire plane of the disk perpendicular to the direction of rotation and rotation of the system.

This is not an ordinary field of centrifugal force, since the force of this field acts simultaneously in all directions on the plane from the zero point to the periphery - the edge of the system in all directions and propagates along force curves whose force returns to the center of the system. which makes it stable.

The field is perpendicular to the axis of rotation and extends into the plane of the disk.

Occurs at the zero point.

The force but the field propagates radially from the zero point to the edge of the circle of the field.

This is one field and one force that spreads from the center of the sun to all planets of the solar system to the edge of the field

As the rotational force increases, the field force generated by this force increases and the same propagates along curves whose angle decreases as the force of this field increases.

This is the field directed from the sun to the planets in the solar system and extends to the end of the solar system.

This is one field - the field of planet repulsion. This is one field of three vortex fields that cause gravity on Earth and on every planet.

Therefore, gravity is not the fourth interdependence, and gravity is a consequence of these vortex fields, one of which is the field of Prof. Momchil Dobrev - Halachev - the zero point rotation field.

There is a critical force that if so powerful that it destroys the system. Fig 8.

Proofs. Evidence

Turning a closed system clockwise at a given rotational speed produces the same helical rays as are present in a galaxy. Fig.6, Fig.7. – On the FIBONACCI curve, on the GOLDEN SECTION,

When using a flexible disk-shaped material that is elastic when turning the system, the force of Prof. Momchil Dobrev-Halachev's field stretches the whole system to the edge of the circle system and enlarges this circle-system along curves that are directed from the center of the system - zero point to the edge of the system. Figure 8 the radius increases. The area is increasing. When the speed of rotation is the same, the radius of the system stops growing and falls in harmony. Fig.8.

When the field is not so large and the speed is constant, the size disk of the field is retained, which disk has a larger area and a greater distance from the beginning of rotation of the system.

This design and system proves how a star system, a galaxy is built. The forces that cause the planets to rotate around a star, galaxies around the center of a galaxy, act in the same way.

It's the same system.

The Prof. Momtchil Dobrev-Halachev power is the one power that with the other power also discovered by Prof. Momtchil Dobrev-Halachev create the gravitation on each planet.

The gravitation is not the forth fundamental power in the Universe

The forth fundamental power discovered by Prof. Momtchil Dobrev is part of the powers that is ground of each movement of each galaxy.

The forces in space, the universe, the galaxy.

When space moves, there are TWO FORCES:

- The force that makes it move, being the aspiration of space for impulse
- The force which had hitherto kept him from moving, being the desire of space for inertia.

The pursuit of movement outweighs the pursuit of inertia,

The pursuit of inertia acts as a brake on motion, so the movement is slightly distorted.

Therefore, in the end, it returns to where it started and forms a rotating circle - such as the solar system, the galaxy system, the atomic system.

THE FIRST MOVEMENT IS A CURRENT SPACE.

After aeons, it returns from where it left,

THIS MAKES A HOLIDAY ROUND BELT.

This belt rotates in a plane, rotates with constant rotation.

The rotation in one plane continues until the stress it creates causes a new movement and does not start a new current in space - at right angles to the first, and the same process is repeated.

We now have two rotating planes, one in the other, and it is worth noting that the second plane is formed beyond the first, and therefore its diameter is larger.

The whole evolution depends on the difference and size of these planes.

When the higher acquires the same speed as the smaller and the older, it begins to attract an aspect of it, with the result that the older circle is drawn to the newer one.

The first circle should be considered as having an upper and lower surface. The upper surface of the upstream arch can be regarded as positive and the lower surface as negative. The downward arc is the opposite.

Same with the Second Emerging Circle.

These circles are mutually attracted and repulsed so that you can imagine the upper surface of the ascending arc (of the first circle) being positive, ascending to its corresponding aspect in the second cycle, and the lower surface of the returning arc pressing down so to get a second movement divided by rotating disks.

When this second movement completes its first lap and establishes its steady rotation, a new COSMOS occurs. This is the origin of the cosmos.

The secondary rotation of the first circle is the RING - THAT CANNOT BE MOVED, and the circle of the second formation is that sphere that sets the boundary of the Sphere - the so-called chaos.

There is a secondary branch on the outer sphere, and though it is a rotating circle of motion, for that Cosmos it represents the primary calmness, the immobility in which it is rooted.

It is the FRAMEWORK of the power of KOMSOM, that which assimilates and which alone allows the momentum to be acquired.

THE RING - The so-called Chaos arises from the reaction of the primal force to get its impetus.

It rotates at right angles to the primary rotation and counteracts it.

It is the attraction of the Ring - Chaos that establishes the Ring - COSMOS in its secondary motion and thus forms that secondary rotation which we call the RING - WHAT - CAN'T - BE - MOVE, the first restriction that restricts every universe, the galactic

That is why, in its essence, it is the ORIGINAL movement that enables space to emerge.

The Law of Counteraction - THE FIRST IMPULSE BREAKS A secondary impulse, so that a secondary impulse, in contrast to the first, creates stability.

Secondary rotation occurs as a reaction to the primary rotation.

Restriction is as its function is as a DISPLAY SUPPORT.

It should be understood as a limitation that allows pressure to emerge - as a rejection that allows concentration to be achieved.

Any progress toward a higher plan is a reaction to the constraint.

WE HAVE THE ORIGINAL ROTATION OF THE RING-COSMOS, the counteraction gives rise to the RING - the so-called Chaos, the attraction of the Ring-Chaos, causes the secondary rotation of the Ring-the Space, forming the Ring-which cannot-pass.

This motion in the RING-SPACE, rotating in a plane and at the same time rotating in space as if on an

axis, sets a boundary beyond which the creations of the sphere cannot pass.

THIS SPHERE IS DANGEROUS BY TWO POWER LINES - RINGS - SPACE and RINGS - CHAOS, rotating at right angles to each other.

The rotation of the Ring-Cosmos is the source of the force from which evolution derives its impulse, and the rotation of the Ring-Chaos is the source of the force from which restriction draws its power.

THE RING - CHAOS did not belong to the dangerous sphere, but to the outer space.

THE RINGS OF THE RING-SPACE are facing the sphere that it encircles.

The aspirations of the RING - CHAOS are turned to the space that surrounds it.

The Ring - Space seeks to expand the center.

The Ring - Chaos seeks to expand the periphery.

The Ring - Space seeks to harden by contraction.

The Ring of Chaos seeks to return to the UNDERTAKEN from which it arose, and therefore, if its influence were unimpeded, it would reduce the sphere which is in danger.

GEOMETRIC STRUCTURE - BASED ON THE FIBONACCI SERIES AND THE GOLDEN SECTION DESCRIBING THE ETHERIC STRUCTURE IN A STAR SYSTEM IN WHICH THE PLANETS REVOLVE. Figure 12. Figure 12 illustrates the above described system of spiral circles. The red line describes the vortices of forces that govern the system in a star system.

THE RING - SPACE if its influence were unimpeded, it would be static in the immediate present.

THESE TWO INFLUENCES ARE THE SOURCE OF ALL POWER IN THE SPACE.

THE RING-SPACE, because it hardens, builds, THE RING-CHAOS, because it scatters, never grows.

POWER CIRCUITS THROUGH A ROTATE ANGLE WITH respect to each other and therefore in opposition, and that simply the angle of the first that arises is called "positive" and the opposite angle of the primary plane is called "negative" and is quite possible in another Space the first plane has started to rotate at another angle - the angle of your "negation".

In one galaxy are twelve beams and seven cosmic levels.

Space consisting of THREE rotating motions.

Movement in space - pure movement.

The primal movement that gives rise to all that exists begins before there is anything that moves.

The SPACE is limited by this movement, which is called - THE RING - WHAT - CAN'T - CAN - BE - BE - MOVE. This is the limit of any galaxy, the solar system, of one atom.

There are also two-way movements.

The Ring of Space and the Ring of Chaos.

These three movements - the first trinity, so the supreme being in a new manifestation is always understood as the TRINITY - and three is a fundamental number.

Whatever subsequent tensions may arise, they cannot be regarded as a balance of these three forces:

- The power of the Ring Space, which strives for the center.
- The power of the Ring - Chaos - which strives for outer space.

In / the power of the Ring - which - cannot - be crossed, which maintains a balance between them and

The Ring - which cannot be-transmitted is derived from the RING - SPACE and is therefore more a part of its nature than of the Ring-Chaos.

The Space Ring seeks to focus energy as the Ring Chaos seeks to dissipate.

The Chaos Ring cannot build anything because whatever force it generates, it is dissipated indefinitely in the outer space.

The motion of the cosmic ring creates secondary vortices, it is bounded by the ring - chaos, so the inward band expands into a rotating disk with a fixed center.

In practice, this becomes a rotating sphere. This system gives rise to rotating radii, which we call rays. This is a spiral connecting the center to the periphery

If there are streams that flow to the periphery, then the stream flows to the center.

The center is a synthesis and balance of all forces.

If there is a flow of rays from the outside and then inwards.

The outward flow stream is at the top and the inward flow stream is down i.e. circular motions are created. The movement of rays and concentric circles. The rays are 12 and the concentric circles are seven

If tangent raises are obtained. The intersection of circles and rays generates vortices - a tangential motion at an acute angle. There are interactions between the rings, the interaction of the secondary rays and concentric circles, tangential motion. There is movement of rings, rays, and concentric circles, movement on tangents inside the segment, movement in vortices.

Light And Every Electromagnetic Wave Is Propagated Through A Works As An Alternating Electromagnetic Wave And At The Zero Point Is The Materialized Particle.

GEOMETRIC STRUCTURE OF LIGHT

The structure includes an electric and a magnetic component that rotates clockwise and rotates 90 degrees with each rotation.

This geometric structure is explained by the fact that what is the receiver that perceives the light signal and decodes it.

The more accurately the receiver overlaps the geometric structure of an object, such as light, the better it decodes it, understand - such as the eye.

A vesicum riskis rhombus describes the structure of the electromagnetic wave of light - with one length representing the magnetic component, the other representing the electrical component, both rotating clockwise as a volumetric structure every 90 degrees. The light matrix is based on the square root of 3.

Figure 9 describes the geometrical structure of the light - its cross-section - perpendicular to the geometrical structure itself. Figure 11 of the light which includes all the relevant component frequencies of the light.

Alternation of a wave that rotates to the right and creates a material structure - either a photon, an electron or any other particle

The Truth About The Electromagnetic Wave - An Alternating Wave Structure Ending At The Zero Point With A Particle - Corpuscule - The Unification Of Wave And Corpuscule Theory In One Theory - Based on the 1991 expert opinion of Prof. Momchil Dobrev

Figure 10 describes the geometric structure of the electromagnetic wave, which is a volumetric structure that represents a volume that rotates 90 degrees in the clockwise direction.

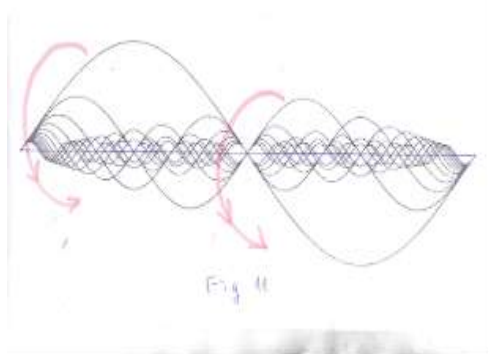

At point A and point C, this is actually a point - a particle - for the light - Photon.

For other frequencies, this represents an electron and other particles.

In reality, when rotated 90 degrees along the axis of propagation, it is a question of the materialization of the wave structure - the wave function.

THE REAL GEOMETRIC STRUCTURE OF LIGHT - A DRILL with the following structure that rotates clockwise at an angle of 90 degrees. The ratio of the long side to the short side or the length of the electrical component to the magnetic component is equal to the square of 3. Feature 11.

The geometric structure of the leaves is the same as they should receive light and decode it and vice versa to receive energy. i.e. to photosynthesize.

Really The Geometric Structure Of The Ether Creates The Geometric Basis For The Movement Of Light

POSTULATE Number 9- of THEORY OF THE UNIVERSE –

PROPAGATION OF PARTICLES, ELECTRONS along circuits and others occurs by alternating a wave drill with a particle. The WAVE DIRECTION represents the clockwise direction of all frequencies of light - for example, for light, because the values of the electromagnetic field are different from zero, and at a point where they are zero, the corresponding particle materializes, the corresponding radiation, emission. THIS IS THE UNION OF THE WAVE THEORY WITH THE CORPUSCULAR THEORY.

POSTULATE Number 10 of UNIVERSE THEORY

LIGHT SPREADS ON A WORTH PATH, with the wave part including the electro-magnetic field, and at the zero point, where the electric and magnetic field at zero value, the PHOTON PARTICLE of Light MATERIALIZES.

POSTULATE Number 11 OF THE THEORY OF THE UNIVERSE

Vortex fields exist BASED ON A PRECISELY DETERMINED SPATIAL GEOMETRIC STRUCTURE of the ETHER - of SPACE. THE ETHER HAS A PRECISELY DEFINED GEOMETRIC STRUCTURE, INCLUDING VORTEX FIELDS..

The LIGHT is a WORTH and spreads in a precisely defined way a vortex spiral as in ONE PART IT REPRESENTS A WAVE and in the points of zero union IT REPRESENTS A CORPUSCULE. THE STRUCTURE OF THE ETHER thus INCLUDES THE WAVE STRUCTURE OF ONE PART and the CORPUSCULE and an image.

THIS IS GENERATED BY ZERO POINT ENERGY.

POSTULATE Number 12 of THEORY OF THE UNIVERSE

EACH VORTEX SPECTRUM - ITS SECTION REPRESENTS A MANDALA and THE NUMBERS OF THIS MANDALA ARE REPRESENTED in a precisely defined way and are READ - THIS IS THE INFORMATION OF THE CORRESPONDING OBJECT/ ORGAN/ STRUCTURE.

EACH OBJECT No. STRUCTURE / ORGAN besides a frequency spectrum also has a precisely defined information NUMERICAL MATRIX, which is VISIBLE FROM THE STRUCTURE OF THIS WORTH SPECTRUM.

POSTULATE Number 13 of UNIVERSE THEORY

The spread of energy and information occurs only with vortex movements. This alone is the easiest way to predict energy and information. Hence the connection of information and energy. This is the only way energy and information are spread - the vortex fields. Energy and information do not travel on STRINGS. THE VORTEX IS THE BASIS OF THE UNIFORM FIELD.

Actually theory of vortex fields by Prof. Momil DOBREV-HALACHEV as early as 1991 and proves the existence of vortex fields in the construction of matter at the lowest to the highest level, starting from the atomic construction, to the construction of star systems, galactic systems of the universe . On the other hand, vortex fields are also present in the construction and functioning of the human body.

READING DNA information is done in the same way.

The movement of energy in the human body happens in the same way.

POSTULATE - 14 of THEORY OF THE UNIVERSE

On the other hand, the cosmological theory of information proves that vibrations are the basis of the existence of all objects in the universe and man in particular, in the HUMAN BODY ORGANS. My vibrations had a vortex structure.

Only the vortex structure can propagate in a space – in this case Cosmos. The spread of information in the Cosmos, respectively in the HUMAN BODY, occurs only on a vortex principle. Information is read, written, changed in a whirlwind way and a whirlwind way. Even at the cellular level there are precisely

defined vibrations with precisely defined frequencies and sparks. Vibrations are vortex fields. Reading and execution of information in DNA occurs only on a vortex basis. The vortex principle is and underlies the creation of universes with a sun and planets revolving around it. Each cell, even each organ, vibrates with a precisely determined frequency when it is in a healthy state and precisely determined other frequencies when it is in a diseased state. The deviation from the interval norm of a "healthy" organ vibrations proves the opposite, that the corresponding organ is sick. Vortex fields actually carry, spread, create both information and energy. In reality, there is a conversion of information into energy and vice versa. Actually, on the basis of the theory of vortex fields, the passing of material in a process of materialization and dematerialization, in which processes information is not lost, is proven in an indisputable way. Vortex fields, on the other hand, underlie matter and antimatter. Vortex fields emit vibrations precisely defined and at precisely defined intervals. This is the relationship of vortex fields to cosmological information theory. Three certain principles apply to every vortex system: There is a force that is the basis of the vortex - at its center and.

Explanation of Newton's bucket phenomenon by the DISCOVERED POWER by Prof. Momtchil Dobrev-Halachev

The device described in point 2 actually proves and describes the phenomenon observed in the so-called Newton bucket. Below is an explanation of the Newton bucket phenomenon. Likewise, a zero point appears at the center of the system, which creates the force F2 that acts from the center of the system to the periphery along the radius of the system. In this way the water mass is displaced on the basis of the action of force F2 at the periphery of the vessel - the bucket. Because the fluid is limited by the bottom and the walls, the force pushes the fluid from the center of the system to the periphery on the wall above the vessel, since the density of the system is maintained and because the density of the water mass remains the same, the water mass which, due to the force F2, pushes the water mass to the periphery of the vessel, it is displaced by the force of the force F2 up the walls of the vessel to balance the system. Fig 4 and Fig 5. In fact, at point O, the zero point appears, which causes the F2 bulge, which is from the center to the periphery, along the entire circumference of the disk.

The Prof. Momtchil Dobrev-Halachev fundamental power is ground of the Prof. Momtchil Dobrev-Halachev; "The theory of the growth of the Sun, Earth, planets in a star system and every galactic system" based on the action and of "Prof. Momtchil Dobrev - Halachev Field" as the main reason for this growth.

In fact, the reason for the expansion of the earth's crust is due to the action of this field by Prof. Momtchil Dobrev-Halachev is its strength and impact.

This extension is periodic and depends on the angular velocity of rotation of the Sun's core

The growth rate is determined by the action of the field but Prof. Momtchil Dobrev - Halachev. This growth is based on

The growth of the whole system - on Earth, on all planets and on the Sun - depends on the speed of rotation of the planets around the Sun, which process is caused by the decade of the field but Prof. Momtchil Dobrev - Halachev.

The growth factor is in a specific area of the earth and this area follows the action of the field but Prof. Momtchil Dobrev - Halachev.

In this way, not only the growth rate of the Earth's solar system for a specific period of time can be calculated, but it is also possible to determine the system's growth rate for each time period in the past and in the future.

The present theory of Prof. Momtchil Dobrev - Halachev for the growth of the growth of the earth and the celestial bodies refutes all hitherto theories of the growth of the Earth - Grossov's theory, Belousov's hypothesis, Eded theory, Kerry's theory, Otto Schmidt's theory

The equation of Prof. Momtchil Dobrev - Halachev describing this system based on the action of the field of Prof. Momtchil Dobrev - Halachev proves the increase of the orbital radii And the division of the

continents follows the action of Prof. Momchil Dobrev - Halachev.

The increase in the mass of the Earth The increase in the volume and the surface in the regions exactly defined on the Earth contrary to all theories and - the increase of the Earth's radius on the basis of the action of Prof. Momchil Dobrev - Halachev also gives an explanation of the displacement of the continents; and proportional to the movement of the continents.

Based on the formula of Prof. Momchil Dobrev - Halachev it is possible to calculate the initial initial radius from the time of the Earth's development.

In the opposite order, on the basis of the formula of Prof. Momchil Dobrev we can determine the dimensions - radii, volume of the Earth at any time interval interval point.

Since the structure of the Earth is made up of flexible and elastic connections at the rotation of the system, the force of the field of Prof. Momchil Dobrev - Halachev stretches the whole system to the edge of the system of the circle and enlarges this circle - the system along curves that are directed from the center of the system - zero point to the edge of the system. Figure 8 the radius increases. The area is increasing, the volume is increasing. When the speed of rotation is the same, the radius of the system stops growing and falls in harmony.

When the field is not so large and the speed is constant, the size of the disk of the field, which is a larger surface area and a greater distance from the beginning of rotation of the system, is maintained. With a minimal change of speed, the corresponding change of radius is also induced - on the area of the plane of the equatorial plane.

The equation of Professor Momchil Dobrev - Halachev describing the field of Professor Momchil Dobrev - Halachev is at the heart of the Theory of Growth - the growth of Earth and the celestial bodies.

Basics of the THEORY OF THE UNIVERSUM developed by Prof. Mariola Gariova and Prof. Lord Momchil Dobrev - Halachev in the year 2005, basics of the Cosmological theory of Information and Vortex Field Theory developed by Lord Prof.

Momtchil DObrev - Criticism of Relativity Theory of Albert Einstein and Supplementation of Quantum Theory

Basic Principles of THEORY of Universum - Unified Theory of the Universe, Critique of Relativity Theory of Albert Einstein and Supplementation of Quantum Theory:

- Theory of Albert Einstein and Supplementation of Quantum Theory
- Theory of the Universe Includes and Is Based On the Geometric Field Spatial Structure Of The Ether Which Creates And Through Which Structure Light Is Distributed, All Particles Are Distributed,
- Theory Of The Universe Is A Union Of Wave Theory And The Corpuscular Theory
- Theory Of The Universe Based On The Geometric Structure Of The Ether
- Theory Of The Universe Creates The Basis Of Existence Of Every Object/ Structure/ Organ/ Organism
- Theory Of The Universe Creates The Mechanism Of Creation Of Different Dimensions And Fields,
- A Theory Of The Universe Creates The Mechanism Of The Existence Of Consciousness And Its Dimensions

1991 Momchil Dobrev Dobrev creates Cosmological theory of information (Dobrev , 2009) and theory of vortex fields (Dobrev , 2012)- the basis of everything. In the same year Momchil Dobrev created two free energy generators using the theoretical and practical solutions of both theories, creating prototypes, but actually refusing to start regular production because he knows that all scientists and inventors create such generators soon after they are killed.

The real vortex theory proves the existence of swirling fields in the fabrication of matter at the lowest to the highest level, starting from the atomic structure, to the construction of star systems, galactic systems of the universe. On the other hand, the vortex fields are also present in the construction and functioning of the human body.

On the other hand, the cosmological theory of information proves that vibrations are the basis of the existence of all objects in the universe and man in particular. Even at the cellular level there are precisely defined vibrations of precisely defined frequencies and frequency spheres. Each cell, even every organ vibrates with exactly the same frequency when it is in a state of health and certain other ones when it is in a disease state. The deviation from the interval norm of the "healthy" body vibrations proves the opposite that the body is sick.

In February 1985, Momchil Dobrev, under the leadership of Professor Karl Heinz von Gotte, found superconductivity, but because of the intervention of a

Bulgarian state security agent then working at the Berlin embassy in Berlin and the US CIA, stealing materials and betraying them, but Momchil Dobrev Dobrev refuses, is forbidden to publish the discovery. So 1985 because of State Security cop Prof. Gote and Momchil Dobrev are not awarded the Nobel Prize in Physics. The Nobel Prize in two years has been given to two scientists from Switzerland to discover superconductivity in September 1985. - seven months after Prof. Gote and Momchil Dobrev.

The vortex fields actually carry, distribute, create both information and energy. There is actually a conversion of information into energy and vice versa. In fact, on the basis of the theory of the vortex fields, the passage of the material in the process of materialization and dematerialization is undisputed, in which the processes do not lose the information. On the other hand, the vortex fields are the basis of matter and antimatter. Swirl fields emit vibrations precisely defined and at specified intervals.

This is the relationship of the vortex fields with the cosmological information theory.

Three distinct principles apply to each swirling system:

- There is a force that is at the heart of the whirlwind - in its center, and it controls the entire structure. For each structure swirling forces that cause the structure to strive for center, swirling forces that cause the structure to strive for external propagation, and a separate force that prevents objects from the structure from leaving the structure itself - that is, has the force of limiting the size of the structure.

Vortex structures are also hurricanes. In the center of hurricanes is peace.

There are chakras in the human body both at the physical level and at the other two levels, which besides supplying information and energy to the respective glands and levels and organs at these levels, but it also raises the energy to the highest level.

The whirling structure that radiates the corresponding vibration - its section

Light is a vortex. Each electromagnetic wave is a whirl, the point at which both the electric field and the magnetic field are the zero point. Moreover, the space generating the vortices is geometrically based on the golden section, the numbers phi and pi. Electromagnetic wave is a whirlwind in a straight line. A basic element in the cosmological theory of information is also to note the basic principle.

The single field covers and is based on vortex fields. The dissemination of energy, of information

becomes unique with the swirling movements in a spiral way - right rotation. This is the easiest way to predict energy and information in the universe. That is why it is the connection of information and energy, ie. both are transmitted in the same way. Only this is the way of spreading energy and information - the vortex fields. Energy and information are not distributed on STRUMENTS. THE VORTEX FIELD and its forms are THE BASIS OF THE SINGLE FIELD.

The vibrations had a swirling structure.

Only the vortex structure can spread in one space - in this case the Cosmos.

Spreading information into space is purely a whirlwind principle.

The two theories prove that real human thought can be both a carrier of both information and energy and cause changes at the material level and at the spiritual level.

There are 12 dimensions of consciousness, the basics of which are types of vortex fields. Only On the first density level (first, second and third dimension) lies our incarnate self.

At each density level corresponds a certain type of matter and type of consciousness - that is, an information field with an information structure for the relevant plurality level.

Our first harmonic universe, or that of Earth, we have a biological structure that is based on carbon and matter is on a physical level.

In the depths of a harmonious universe where our souls inhabit, there is a silicon-carbon biological structure, and matter is on a physical-etheric level, also called a semi-etheric level.

In a third harmonic universe, the creatures are composed of crystalline silicon and the matter of net is entirely etheric.

The biological structure of the fourth harmonic universe, where the current levels of consciousness or the state of its current state are found, is a "crystalline liquid light," and the particles at that level are called premastery.

Dimensions 13, 14 and 15 at five density levels are composed of antimatter (other than antimatter) and the biology of the beings there is called "crystalline light radiation".

At the three levels above this dimension, namely polaris, triadic and euatec levels, the beings are

of pure consciousness and these levels are not considered dimension.

Our soul includes us and eleven incarnated personalities, or a total of twelve people.

Our soul together with another 11 people forms our air. Accordingly, the smell is composed of 144 incarnated personalities.

Twelve halves make up the Christ avatar, which includes 144 people and 1,728 incarnate personalities.

Accordingly, 12 Christ avatars are connected and make up one rhesus adept.

The relics of the Adept include, in turn, a further 144 breaths, 1,728 people and 20,736 incarnate figures.

All 12 personalities of the soul are placed in the so-called time vector. They are arranged as the clock on the dial is marked. In this way, 6 pairs of born persons are formed. These are 1 and 7, 2 and 8, 3 and 9, 4 and 10, 5 and 11, 6 and 12.

Most energy is allocated to pairs 12 and 6 as well as to pairs 3 and 9. These personalities are called "(the ethics" faces of the soul ".Most often position 12 is a man and position 6 is a woman.They have the same DNA template.

Clearing the link with your own avatar helps strengthen everyone's biofields and creates protection from negative intrusions up to 12 dimensions.

Whirlwinds, Vibrations, Information, Energy

The dissemination of information in space is only a whirlwind.

The information is read, recorded, modified in a vortex and vortex manner.

Even at the cellular level, there are precisely defined vibrations with precisely defined frequencies and frequency spectra.

Vibrations represent vortex fields.

Reading and executing information In DNA, it is only a vortex principle.

The whirlwinds - vortex principle is at the heart of the creation of universes with the sun and planets orbiting it.

Vortexes are the motions that control the motion in atoms.

Every cell, even every organ, vibrates with the exact frequency when it is in a healthy state and precisely defined others when in a diseased state. The deviation from the interval norm of a "healthy" organ vibration proves to the contrary that the organ is ill.

Vortex fields actually carry, propagate, generate both information and energy. There is actually a conversion of information into energy and vice versa. Indeed, based on the theory of vortex fields, the passage of the material in the process of materialization and demythialization in which processes do not lose information is indisputably proven. Vortex fields, on the other hand, are the basis of material and antimatter. Vortex fields emit vibrations at precise and specified intervals.

This is the connection of vortex fields with the cosmological theory of information.

There are three definite principles for each vortex system:

There is a force underlying the whirlwind - at its center and commanding the whole structure. For each structure, there are vortex forces that cause the structure to aspire to the center, vortex forces that cause the structure to strive for outer space, and a separate force that prevents objects from the structure from leaving the structure itself - ie. there is a force limiting the size of the structure.

Vortex structures are also hurricanes. At the center of the hurricanes is peace.

In the human body there are chakras both at the physical level and at the other two levels, which, in addition to supplying information and energy to the relevant glands and levels and organs at these levels, also raises energy to the highest level.

The vortex structure that emits the corresponding vibration - its cross section

Light is a whirlwind.

Each electromagnetic wave is a vortex and the point at which both an electric field and a magnetic field are generated is the zero point.

In addition, the vortex-generating space is geometric, with the main factors here being the gold section, the numbers ϕ and π .

As a consequence of the cosmological theory of information are the pyramids between which is the Pyramid of Cheops. This geometric figure is a generator of a corresponding field in which, at the corresponding points of height, when the corresponding frequency or so-called vibration is generated, the anti-gravity, the

processes of metirailization and dematerialization are also generated.

Electromagnetic wave is a vortex in a straight line.

Both theories prove that real human thought can be a vehicle for both information and energy, and it can cause changes at the material and spiritual levels.

Both theories prove that real human thought can be a vehicle for both information and energy, and it can cause changes at the material and spiritual levels.

Testing experiments have been performed at the Scientific Research Institute Dobrev - Halachev AD to prove this.

According to the cosmological theory of information, in order to reach the chakras of the fourth and fifth dimensions of the soul, vibrations should be raised. this was happening in Egypt with a generator.

According to the cosmological theory of information, when a person raises his or her vibration that below 45 degrees with closed eyes generates a light beam with a corresponding vibration frequency, then that light beam and, accordingly, his gaze - with closed eyes below 45 degrees passes through a specific symbol - that is the symbol of Ankh, also known by Atlantis and the Atlanteans. This is the symbol through which the elevation and the corresponding look pass.

There are 12 dimensions of consciousness, the basis of which are types of vortex fields. Only one

Therefore, the DNA helix is double and counter-clockwise.

Reading information from DNA is in that one and only direction.

This is the direction of reading and writing information.

Snakes indicate the generation of the power that the information reads.

This is the direction of energy generation and maintenance of vortex fields.

Movements in the Atomic Nucleus въз основа на вихровите полета и въз основа на геометричната структурата на етера

The electrons move in an electronic field. The electron materializes as an electron after leaving the atomic field.

The nucleus of an atom creates a vortex field and rotates with a precisely defined vibration, which is the vibration of the nucleus and electron field.

Each atom vibrates with a specific spectrum and has a specific vibration.

MOVEMENT SYSTEM IN THE SOLAR SYSTEM based on a vortex field - described above based on the geometric structure of the ether field - along the Fibonacci curve and closing it back to the center

The solar system exists on the basis of rays that propagate along the Fibonacci trajectory of the golden section towards the end of the solar system and from there it returns back along the same trajectory to the center of the solar system - the sun. In these rays, vortex fields move along which concentric circles move planets to the solar system, perpendicular to the plane of motion of planets from the center of the solar system to the end solar system, there is a field that closes the field and makes it stable.

The ether is the medium for the movement of light, of every particle,

ETHER is the geometric spatial field structure of the zero point which is the basis for the field structure of every object./structure/fiva system, of consciousness.

Gravity is the result of the vortex motion in the solar system and the vortex motion of the Earth around its axis. The gravity is a result of the power one of wich is the discovered 1991 by Prof. Momtchil Dobrev-Halachev power and the second other power discovered by Prof. Momtchil DOBrev which will be described in other paper.

Whirlwinds

The chakras are vortices

Rotating motion - accelerating the field - the center generates free energy. Thus, and based on these truths, Prof. Momchil Dobrev 1991 created two free energy generators.

Ether - the essence of space and the medium for the movement of light.

Gravity is the result of vortex movements.

Different vortices

Light is a vortex - a linear vortex.

Vortexes in the plains.

The electromagnetic wave is a whirlwind

The neutrino carries information.

An electron is a materialized particle in an electron field - it materializes in an electron as it leaves the atom.

Rotating the kernel causes vibrations.

Vortices have different properties.

Feynman schemes - vortex interaction.

The rotation of the nucleus creates different space and electronic space-field.

An electron is a materialized object of electronic space.

The world is fluid BASED ON THE GEOMETRIC FIELD STRUCTURE of THE ETHERE

The world is fluid - it is the middle - space. Just as the speed of sound is precisely defined in the middle - the fluid atmosphere,

- As the velocity in water is precisely defined in the medium - the fluid - the aqueous medium.
- So the speed of light is precisely defined in the medium - the fluid - the expanse of the ether.
- The cyclone - a typhoon is a fluid with an element in the center of a gas molecule.
- The galaxy is a fluid with an element in the center of the vortex - a star. Plasma is fluid. Types of fluids cause different spaces.
- Fluids with homogeneous elements / homogeneous / homogeneous fluids.
- Fluids with heterogeneous different elements - heterogeneous fluids.
- Electrically neutral fluids
- Polysyrin and fluids.
- Electric and magnetized fluids
- Ionized fluids - plasma.
- The world is a fluid space. Is it a closed system - the universe.
- Vacuum is a heterogeneous fluid.
- Hyperbolic geometry in physics.
- Sound waves, electromagnetic waves are a kind of vortex field.
- Space has a vortex character and essence
- Space is a field, it has a quantum character, a material character, an informational character, a conscious character.
- Every vihir carries information - information
- Space is fluid in nature. According to fluid in space there are vortices that can be opened, closed vortices, point, linear, plane, and others.

The laws of thermodynamics are valid for fluids.

As the temperature decreases, the velocity of the gas component - the particle decreases faster than the gas volume, including the gas radius.

It thus follows that the ratio of the radius to the velocity increases, i.e. the passage of the gas portion along the radius increases - i.e. this is evidence of an expanding universe.

Closed vortices have different shapes, one of which is fertilizer and the other is a universe. The quantum is a vortex.

The first duality is "space + and" motion"

The first manifestation is a current in space

When space moves, it has a special quality - since it has no friction - that it never loses momentum but continues to flow.

The forces in space, the universe, the galaxy. BASED ON THE GEOMETRIC FIELD STRUCTURE OF THE ETHER

When space moves, there are TWO FORCES:

- the force that makes it move, being the aspiration of space for impulse
- the force which had hitherto kept him from moving, being the desire of space for inertia.

The pursuit of movement outweighs the pursuit of inertia,

The pursuit of inertia acts as a brake on motion, so the movement is slightly distorted.

Therefore, in the end, it returns to where it started and forms a rotating circle - such as the solar system, the galaxy system, the atomic system.

THE FIRST MOVEMENT IS A CURRENT SPACE.

After aeons, it returns from where it left, THIS MAKES A HOLIDAY ROUND BELT.

This belt rotates in a plane, rotates with constant rotation.

The rotation in one plane continues until the stress it creates causes a new movement and does not start a new current in space - at right angles to the first, and the same process is repeated.

We now have two rotating planes, one in the other, and it is worth noting that the second plane is formed beyond the first, and therefore its diameter is larger.

The whole evolution depends on the difference and size of these planes.

When the higher acquires the same speed as the smaller and the older, it begins to attract an aspect of it, with the result that the older circle is drawn to the newer one.

The first circle should be considered as having an upper and lower surface. The upper surface of the upstream arch can be regarded as positive and the lower surface as negative. The downward arc is the opposite.

Same with the Second Emerging Circle.

These circles are mutually attracted and repulsed so that you can imagine the upper surface of the ascending arc (of the first circle) being positive, ascending to its corresponding aspect in the second cycle, and the lower surface of the returning arc pressing down so to get a second movement divided by rotating disks.

When this second movement completes its first lap and establishes its steady rotation, a new COSMOS occurs. This is the origin of the cosmos.

The secondary rotation of the first circle is the RING - THAT CANNOT BE MOVED, and the circle of the second formation is that sphere that sets the boundary of the Sphere - the so-called chaos.

There is a secondary branch on the outer sphere, and though it is a rotating circle of motion, for that Cosmos it represents the primary calmness, the immobility in which it is rooted.

It is the FRAMEWORK of the power of KOMSOM, that which assimilates and which alone allows the momentum to be acquired.

THE RING - The so-called Chaos arises from the reaction of the primal force to get its impetus.

It rotates at right angles to the primary rotation and counteracts it.

It is the attraction of the Ring - Chaos that establishes the Ring - COSMOS in its secondary motion and thus forms that secondary rotation which we call the RING - WHAT - CAN'T - BE - MOVE, the first restriction that restricts every universe, the galactic

That is why, in its essence, it is the ORIGINAL movement that enables space to emerge.

The Law of Counteraction - THE FIRST IMPULSE BREAKS A secondary impulse, so that a

secondary impulse, in contrast to the first, creates stability.

Secondary rotation occurs as a reaction to the primary rotation.

Restriction is as its function is as a DISPLAY SUPPORT.

It should be understood as a limitation that allows pressure to emerge - as a rejection that allows concentration to be achieved.

Any progress toward a higher plan is a reaction to the constraint.

WE HAVE THE ORIGINAL ROTATION OF THE RING-COSMOS, the counteraction gives rise to the RING - the so-called Chaos, the attraction of the Ring-Chaos, causes the secondary rotation of the Ring-the Space, forming the Ring-which cannot-pass.

This motion in the RING-SPACE, rotating in a plane and at the same time rotating in space as if on an axis, sets a boundary beyond which the creations of the sphere cannot pass.

THIS SPHERE IS DANGEROUS BY TWO POWER LINES - RINGS - SPACE and RINGS - CHAOS, rotating at right angles to each other.

The rotation of the Ring-Cosmos is the source of the force from which evolution derives its impulse, and the rotation of the Ring-Chaos is the source of the force from which restriction draws its power.

- THE RING - CHAOS did not belong to the dangerous sphere, but to the outer space.
- THE RINGS OF THE RING-SPACE are facing the sphere that it encircles.
- The aspirations of the RING - CHAOS are turned to the space that surrounds it.
- The Ring - Space seeks to expand the center.
- The Ring - Chaos seeks to expand the periphery.
- The Ring - Space seeks to harden by contraction.
- The Ring of Chaos seeks to return to the UNDERTAKEN from which it arose, and therefore, if its influence were
- THE RING - SPACE if its influence were unimpeded, it would be static in the immediate present.
- THESE TWO INFLUENCES ARE THE SOURCE OF ALL POWER IN THE SPACE.
- THE RING-SPACE, because it hardens, builds, THE RING-CHAOS, because it scatters, never grows.

POWER CIRCUITS THROUGH A ROTATE ANGLE WITH respect to each other and therefore in opposition, and that simply the angle of the first that arises is called "positive" and the opposite angle of the

primary plane is called "negative" and is quite possible in another Space the first plane has started to rotate at another angle - the angle of your "negation".

In one galaxy are twelve beams and seven cosmic levels.

Space consisting of THREE rotating motions.

Movement in space - pure movement.

The primal movement that gives rise to all that exists begins before there is anything that moves.

The SPACE is limited by this movement, which is called - THE RING - WHAT - CAN'T - CAN - BE - BE - MOVE. This is the limit of any galaxy, the solar system, of one atom.

There are also two-way movements.

The Ring of Space and the Ring of Chaos.

These three movements - the first trinity, so the supreme being in a new manifestation is always understood as the TRINITY - and three is a fundamental number.

Whatever subsequent tensions may arise, they cannot be regarded as a balance of these three forces:

- The power of the Ring Space, which strives for the center.
- the power of the Ring - Chaos - which strives for outer space.
- the power of the Ring - which - cannot - be crossed, which maintains a balance between them and

The Ring - which cannot be-transmitted is derived from the RING - SPACE and is therefore more a part of its nature than of the Ring-Chaos.

The Space Ring seeks to focus energy as the Ring Chaos seeks to dissipate.

The Chaos Ring cannot build anything because whatever force it generates, it is dissipated indefinitely in the outer space.

The motion of the cosmic ring creates secondary vortices, it is bounded by the ring - chaos, so the inward band expands into a rotating disk with a fixed center. In practice, this becomes a rotating sphere. This system gives rise to rotating radii, which we call rays. This is a spiral connecting the center to the periphery. If there are streams that flow to the periphery, then the stream flows to the center.

The center is a synthesis and balance of all forces. If there is a flow of rays from the outside and then inwards.

The outward flow stream is at the top and the inward flow stream is down i.e. circular motions are created. The movement of rays and concentric circles. The rays are 12 and the concentric circles are also twelve. If tangent raises are obtained. The intersection of circles and rays generates vortices - a tangential motion at an acute angle. There are interactions between the rings, the interaction of the secondary rays and concentric circles, tangential motion. There is movement of rings, rays, and concentric circles, movement on tangents inside the segment, movement in vortices.
