Dobrev-Halachev, M. (2025) Discoveries by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva that the pancreas has its own brain – between 8,000–9,000 neuron cells in the pancreas, and that the disease first arose at a certain level of consciousness and then materialized at a physical level in the human body, based on the discoveries in 2021, the syndrome of Prince Prof. Momchil Dobrev and Princess Prof. Mariola Garibova-Dobreva, which shows the reason for activation of autoimmune reaction – the law of the autoimmune reaction, and which causes is the reason for Hodgkin's lymphoma, and comprehensive 13-level causal network multilevel energy-information diagnostic system developed by Prince Prof. Momchil Dobrev and Princess Prof. Mariola Garibova-Dobreva in 2006 – brief description, basic postulates of Prince Prof. Momchil Dobrev–Halachev's and Prof. Mariola Garibova-Dobreva's “theory of the universe,” theory of consciousness – 2003, “theory of energy-information genetics, energy-information medicine, psychology,” based on which Prof. Momchil Dobrev won world championship 2021 in fundamental physics and Prince Prof. Momchil Dobrev and Princess Prof. Mariola Garibova-Dobreva won the 2022 world championship in genetics, worthy for more than 3 years for the Nobel Prize in medicine – real denial of Darwin, Einstein. *Indiana Journal of Multidisciplinary Research*, 5(6), 222-237.

Abstract: In this article, we describe how Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva arrives at the essence of when and how an organism's autoimmune reaction is activated, which is part of the law of the autoimmune reaction, and which causes classic Hodgkin's lymphoma. These are things that explain hitherto unexplained processes and phenomena in medicine. This happens after the use of the system created by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva in 2006. Complex 13-level causal network energy-information diagnostic system and theory of energy-information genetics, energy-information medicine, energy-information-psychology, theory of the universe developed by Prof. Mariola Gariova and Prof. Lord Momchil Döbre-Halachev in the year 2006, basics of the cosmological theory of information and vortex field theory developed by Lord Prof. Momchil Döbre – basic structure of the universe. In the article about the described results based on the theory of degrees and levels of consciousness – 12 levels of creation in man 1991 by Prof. Momchil Dobrev, the study proved that in the pancreas there are between 8,000–9,000 neuron cells which prove that in the pancreas there is a brain which contacts the human brain and through the studied holes proves that the disease occurs at a precisely determined level of consciousness in a human before materializing..

Keywords: Theory, Universe, Vortex Field, Energy-Information Genetics, Adaptation.

INTRODUCTION

The article is based on the discovered syndrome – a new disease by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva – in the body of Prof. Momchil Dobrev, after additional studies with the special apparatus developed by Lord Prof. Momchil Dobrev at the Dobrev-Halachev Scientific Research Institute – AD, between 8,000–9,000 “neuron” cells were discovered in the pancreas, which proves that the digestive functions are also guided and managed by the brain, which communicates with the human brain through the vagus nerve.

Based on the equipment of the Scientific Research Institute Dobrev-Halachev – AD and previous studies in 2006–2008 – energy information vortex fields of depressions, it was established that in the back part of the chakras – towards the throat – and in every human being is localized the “subconsciousness,” while consciousness is localized in the front part of the person and respectively in his energy-information system of chakras.

Based on the corresponding fields – bodies of this “subconsciousness” in the corresponding bodies of the person and localization of the disease syndrome of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, with the equipment it was energetically proven that in the energy fields outside the human body there is the same field that communicates and contacts with the disease syndrome in the stomach of Prof. Momchil Dobrev.

This led to the conclusions that really disease – and with it every disease – arises at a precisely certain level of consciousness in a person and then materializes at the level of the physical body.

The article gives a brief description of the 12 levels of consciousness of a human and some of their functions. From here it follows that at which level of consciousness the disease arises respectively in a person and then through DNA it materializes in the corresponding organ, area, and to what extent.

Theory of species – levels of structure of consciousness in the universe by Lord Prof. Momchil Dobrev – 1991–2003, which actually challenge Charles Darwin’s theory of the origin of man, dialectical materialism, and Einstein’s postulate that the speed of light is the greatest, and which is based on the experiments of Lord Prof. Momchil Dobrev with consciousness and the discovered law of informational energy gene adaptation from 2008 by Prince Lord Prof. Momchil Dobrev and Mariola Garibova-Dobreva, and which law is part of the theory of the universe developed in 2005 by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, and which develop energy-information genetics, energy-information medicine, energy-information psychology, energy-information psychiatry, as part of theory of the universum developed by Prof. Mariola Garibova and Prof. Lord Momchil Döbrev-Halachev in the year 2005,

basics of the cosmological theory of information and vortex field theory developed by Lord Prof. Momchil Döbrev – basic structure of the universe and ether, the structure of the ether.

Based on these practical theories, in 1991 Lord Prof. Momchil Dobrev created two generators of free energy, which is obtained from the zero point of the eternal field – a field with a huge conscious potential – unlimited.

Already in 1991, after 1985 and 1986, Lord Prof. Momchil Dobrev in Germany saw the light in the tunnel twice after spending 21 and 7 days in a coma respectively. He developed experiments to prove the power of consciousness and the power of our thought, which can use consciousness to create miracles, to materialize, to see the most distant corners of the universe. After that, Lord Prof. Momchil Dobrev created his theory of species, types, and levels of consciousness, their structure, describing them mathematically.

Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva opened in 2008 the law of energy-information gene adaptation based on a study of the shapes, sizes, and characteristics of young people in development who have been adopted. The conclusion is that children and their characteristics depend and are formed as a result of the energy-information fields of the persons, the parents, with whom the children live and in whose presence the children develop and grow. I.e., this is decisive, and many children are the biological heirs of the parents. The conclusion is necessary after a study of children and families whose children have been adopted.

This proves that this genetic adaptation is the basis and as a consequence of energy-information genetics, energy-information medicine, energy-information psychology, energy-information psychiatry. These sciences, in turn, are part of the theory of the universe created by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva in 2005.

This law discovered by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva really not only denies Darwin’s theory of the origin of man, but is also a springboard to new medicine, genetics, psychology, psychiatry, new physics, and part of theory of the universe, new physics. From this law it follows that consciousness – information energy – forms matter with consciousness. This is a revolution in physics, biology, evolution, cosmos.

Who is Lord Prince Prof. Momchil Dobrev? The same born in 1963. In 1982 he had the imprudence in an interview with the newspaper “People’s Youth” to state that the Bulgarian Communist Party and the DCMS are mafia.

Then, after repressions over his entire family, even more so, Momchil Dobrev’s father – Dobrli Duchev Dobrev, a

financier who managed associations in various industries, transport engineering, mechanical engineering, and the chemical industry, made hundreds of millions of levs in profit for the state Republic of Bulgaria, Momchil Dobrev was forced to escape in 1984 to the German Democratic Republic in the city of Ilmenau, the Technical University. In just one year and three months, Momcil Dobrev completed five years, and in just one year he completed and took the written exams in physics, mathematics, and all other disciplines with distinctions. Therefore, in February 1985, Professor Karl Heinz Goethe invited him to participate in physical experiments in which superconductivity at room temperature was discovered.

After that, the secretary of the Bulgarian embassy, Stoil Stoilov, threatened Momchil Dobrev that if he did not steal the material, in exchange for which he would receive 11 million US dollars and a house in the USA – which proved that this second secretary served the USA and the CIA – his life would be ruined. Despite such threats, Momchil Dobrev did not surrender his Professor Karl Hein Goethe and Professor Manfred von Ardenne – one of the creators of the nuclear bomb for the Soviet Union, who in 1985, after talking with Momchil Dobrev, declared him the next Nobel laureate and the genius of the 20th and 21st centuries.

It is no coincidence that at an international conference in 1985, Professor Michael Roth declared Momchil Dobrev, presenting him to over 500 professors from the whole world, the genius of the 20th and 21st centuries.

At that time, Momchil Dobrev studied theoretical physics, biology, neurophysiology, medicine, logic and cognitive psychology, chemistry, various medical sciences, brain sciences, and other sciences.

These are not accidental things. As a first-grade student, Momchil Dobrev solved math problems for 3–4 classes. As a third-grade student, he solved problems from sixth–seventh grade on tests in just 10–15 minutes, without anyone dealing with him and without even his family providing him with the appropriate training.

As the heir to the Dobrev-Halachev dynasty, Momchil Dobrev follows the principles of honor and dignity of the dynasty, property of the dynasty which are worth billions.

It is no coincidence that Lord Academician Prof. Momchil Dobrev is an educated strong physicist – a master astronomer, lawyer, economist, engineer, studied archaeology, archaeometry, even having licenses as a construction technician to construct buildings.

2. Based on a study that proved the syndrome of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, how the autoimmune reaction of the body activates – the law of autoimmune reactions and

which ultimately causes Hodgkin's lymphoma, and additional research with equipment of the Dobrev-Halachev Scientific Research Institute, the syndrome – a new disease discovered by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva – in the body of Prof. Momchil Dobrev, after additional research with the special equipment developed by Lord Prof. Momchil Dobrev at the Dobrev-Halachev Scientific Research Institute – AD, were discovered between 8,000–9,000 “neuron” cells in the pancreas, which proves that the digestive functions are also guided and managed by the brain, which communicates with the human brain through the vagus nerve.

Based on the equipment of the Scientific Research Institute Dobrev-Halachev – AD and previous studies in 2006–2008 – energy information vortex fields of depressions, it was established that in the back part of the chakras – towards the throat – and in every human being is localized the “subconsciousness,” while consciousness is localized in the front part of the person and respectively in his energy-information system of chakras.

Based on the corresponding fields – bodies of this “subconsciousness” in the corresponding bodies of the person and localization of the disease syndrome of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, with the equipment it was energetically proven that in the energy fields outside the human body there is the same field that communicates and contacts with the disease syndrome in the stomach of Prof. Momchil Dobrev.

This led to the conclusions that really disease – and therefore every disease – arises at a precisely certain level of consciousness in a person and then materializes.

This study proves the influence of the environment in the development of the respective disease, the sequences of manifestation of the respective disease, how the system itself – in this case the digestive system as a separate system – unlocks an autoimmune reaction in order to preserve itself and its parts and functions, which from the side affects the rest of the systems, how after the autoimmune reaction is triggered, the negative energy and accumulation of negative energy generates the corresponding structure – matter – tumors in the mediastinum, which at one point after melting an hour of these tumors goes to the lymphatic system and accordingly unlocks the lymphon disease of Hodgkin's.

Subject of the practical study

Symptomatics

Patient – in time

November 2021 – unlocks reflux

Sore throat – burning throat from acid reflux

Hiccups

This process continues until February 2022. The process of burning the throat from the acids that come from the stomach continues until February. We know that the cells

that make up the esophagus are finer and more fragile than the cells that make up the stomach.

- Reflux treatment begins in mid-February 2022.
- From the end of February 2022, the weight loss begins.
- From the end of February, the spitting of mucus begins – unprovoked, sometimes from 8:00 a.m. for 5–10 seconds until 7:30 p.m. in the evening. Colorless mucus.
- From the end of February 2022, he started having chest pains.
- Mucus spitting intensifies – March, April.
- After gastroscopy – April 2022, there is in the stomach Helicobacter pylori.
- Helicobacter pylori treatment begins.
- Healed.
- Continued spitting of mucus – colorless.
- Sometimes spitting mucus is hot from 08:30 a.m. to 19:30 p.m.
- Pain in the chest continues from the end of February until September 2022 and beyond.

On September 10, 2022, for one week, a lymph node enlargement next to the collarbone on the right was observed. In one week it goes from 3 cm to 5 cm with pain and without touch.

An operation followed – excision of a deep cervical lymph node on the right on September 28, 2022. During the operation, a pathologically changed lymph node was found – with inflammatory changes and a zone of decay. It is the same with a firm consistency and a total size of about 5 cm in length. The subclavian dextro is controlled, which is laterally dislocated from the formation. Excision of the supraclavicular lymph node is performed. Careful hemostasis of the operative field. Layered seam. Sterile dressing.

A sample was taken and after the histological examination of H-1155, H-1158, fragmented material was found, represented by soft tissues with nodular organized cellular infiltrates, represented by lymphocytes, eosinophilic granulocytes, mono- and multinucleated cells, surrounded by pronounced fibrosis, and one adjacent lymph node with chronic sinus lymphadenitis. The morphological picture is suggestive of a lymphoproliferative process.

An immunohistochemical examination of biopsy H-1155-58/22 follows. The materials are composed of soft tissues with abundant proliferation of dense fibrous tissue that encloses nodular fields of various sizes and shapes. The cell composition in them is mature lymphocytes, plasma cells, eosinophils, scattered and in small groups large cell elements with morphological characteristics of Hodgkin, Sternberg, lacunar and

similar in them. In H-1157-58/22, one small lymph node with preserved lymph follicles – primary and secondary – with pronounced sinus histiocytosis is visible.

Immunohistochemistry from paraffin block No. 1158/22 shows:

- CD20 – positive reaction in residual lymph follicles, scattered and in lymphoid groups and in large cell elements.
- CD3 – positive reaction in many scattered and clustered mature lymphocytes.
- CD30 – positive reaction in scattered large cell elements.
- CD15 – positive reaction in many scattered granulocytes and eosinophils and in a significant part of the large cell elements described.
- PAX5 – positive reaction in residual lymph follicles, scattered and in groups of lymphoids and a less pronounced reaction in the described large cell elements.
- CD79a – positive reaction in residual lymph follicles, scattered and in groups of lymphoids.

Conclusion – immunohistochemical data for classic Hodgkin's lymphoma – scleroneodular form. Followed by hematological treatment – ABVD procedure.

2.1. Research and epicrises /discharge summary/:

2.1.1. Discharge summary – issued by the University Multidisciplinary Hospital for Active Treatment from 24.07.2022 to IZ No. 24634/2022, where the diseases, treatment, examination with CT/computed tomography/, treatment, and recommendations for consultations are described. A CT scan revealed a tumor of the thymus gland, changes in the thyroid gland, enlarged lymph nodes up to 12 mm in the mediastinal lymphatic chains, hemangiomas of the liver, dilatation of the esophagus, a nodule in the thyroid gland, which remains to be established after consultation with an endocrinologist. In the sixth segment during examination of the liver, a formation with dimensions of 44/40 mm was found. Myasthenia gravis, severe neurological calcification, was also found.

In the anterior upper mediastinum, a soft-tissue formation is found adjacent to the HRV at the level of the inflow of the left subclavian vein. The formation moderately increases its density in the post-contrast series and is also traced in front of the ascending aorta and truncus pulmonalis and is tangential to the pericardial recess.

In the mediastinal lymphatic chains in stations 2 and 4, contrast-enhancing lymph nodes up to 12 mm are found.

No enlarged lymph nodes were found in the axillae and supraclavicular areas.

The esophagus is dilated along its entire length. Homogeneous structure of the spleen parenchyma with two hemangiomas in the right lobe. Changes in the thyroid gland. Hemangioma of the liver, dilatation of the esophagus. Colonic diverticula.

2.1.2. Study of the imaging department of the University Hospital for Active Treatment St. Ivan Rilski dated 19.09.2022, from which cervical lymph nodes are visible on the right with dimensions of 29.7/15.9 mm.

In the lung parenchyma, nodules with axial dimensions up to 5.7 mm.

Upper-anterior mediastinum central and right paravasal plumper of tissues, the largest of which with axial dimensions 29.8/29.5 mm, and multiple RI findings, study number 20619/19.09.2022 of Dr. A. Hadzhiyska.

2.1.3. Epicrisis /discharge summary/ of 15.09.2022 of the Multispecialty Hospital for Active Treatment in Neurology and Psychiatry "Sveti Naum," ex. No. 982 of 15.08.2022.

On the occasion of the diagnosed myasthenia gravis, I was admitted to the Medical Center for Neurology and Psychiatry at Sveti Naum from 08.08.22 to 13.08.22, for which I am attaching the epicrisis with the leading diagnoses: damage to the cervical roots, myasthenia gravis, as well as the findings in magnetic resonance imaging – arachnoid cyst of the cerebellum. An EMG was also performed, at which the first described diagnosis was established.

With regard to the disease myasthenia gravis, it is a severe autoimmune neurological disease, for which the ordinance on medical examinations in the nervous diseases section, item 3.2, determines a minimum percentage of loss of working capacity of 50%, according to 3.2 – medium degree 75% and the last severe 100%.

2.1.4. Discharge summary on 28.09.2022 at the University Hospital for Multidisciplinary Treatment St. Ivan Rilski – Sofia – classic Hodgkin lymphoma, scler nodular form.

2.2. Symptomatics

When a scanner is needed – proving tens of tumors – tumors in the thymus are numerous, the largest being 29.8/29.9% – multiple tumors.

Large lymph node 29.7/15.9 mm which, during the operation on 29.09.2022, had become 3 by 2 centimeters and it was in an inflamed state with huge pain.

Multiple evidences of an inflamed lymphatic system.

Evidence for me:

- A person with tumors – multiple thymomas in the thymus, enlarged lymph nodes next to the thymoma, enlarged lymph nodes in the throat, enlarged lymph node 3 by 2 cm, separately from the thymoma.
- A person who after the first bite begins to vomit mucus from 10 to 50 minutes.
- A person who sometimes expels mucus under compulsion from 8.20 a.m. to 7.45 p.m. one day for 3–4 minutes.
- Even after a sip of water, it starts to produce mucus.
- Loss of energy from 11 a.m. to 1–2 p.m. and after 3 p.m. to 6–7 p.m. every day.
- Pain in the back every day from 1 p.m. to bedtime.
- Pain in the legs from 1.30 p.m. until bedtime.
- Chest pains.
- Reflux.
- Tumors – multiple tumors.
- Enlarged lymph nodes everywhere.
- Formation of air in the esophagus.
- Origvina without eating.
- Cerebral cyst.
- Presence of air in both esophagus and abdomen.
- Weight loss – over 25 kilograms and every week 3–4 kilograms.
- Forced hiccups.
- Forced drowning.
- Inability to swallow.

Even when sleeping for 1–30 hours, mucus enters the mouth, and from the threat of suffocation, it is necessary to spit out this mucus.

Imaging diagnostics 19.09.2022CT data of edema of the mucosa of both maxillary sites.

CT findings of rounded and enlarged right supraclavicular cervical lymph nodes, with maximum dimensions up to 29.7/15.9 mm.

There is no CT data for pathologically enlarged axillary lymph nodes bilaterally.

CT scan showing hypodense nodules in both thyroid lobes.

3. Conclusions from research and based on the discoveries of the syndrome – a new disease by Prof. Momchil Dobrev and Prof. Mariolao Garibova-Dobreva – in the body of Prof. Momchil Dobrev, after additional research with the special apparatus developed by Lord Prof. Momchil Dobrev at the Dobrev-Halachev Scientific Research Institute – AD, between 8,000–9,000 "neuron" cells were discovered in the pancreas, which proves that the digestive functions are also guided and managed by the brain, which communicates with the human brain through the vagus nerve.

3.1. Based on the equipment of the Dobrev Research Institute – Halachev – AD and previous studies in 2006–2008 – energy information vortex fields of depressions, when it was established that in the back part of the chakras – towards the throat – and in every human being is localized the “subconsciousness,” while consciousness is localized in the front part of the person and respectively in his energy-information system of chakras.

Based on the corresponding fields – bodies of this “subconsciousness” in the corresponding bodies of the person and localization of the disease syndrome of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, with the equipment it was energetically proven that in the energy fields outside the human body there is the same field that communicates and contacts with the disease syndrome in the stomach of Prof. Momchil Dobrev.

3.2. This led to the conclusions that really disease – and therefore every disease – arises at a precisely certain level of consciousness in a person and then materializes at the level of the physical body.

3.3. Explanations and conclusion of the study that proved the syndrome of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, how the autoimmune reaction of the body activates – the law of autoimmune reactions – and which ultimately causes Hodgkin’s lymphoma.

The patient has been under stress to a great extent since February 2020, when after the patient protested against the mafia in Bulgaria for more than 40 days in front of the courthouse with posters with evidence of this mafia in the prosecutor’s office, court, state, exactly by those against whom he protested, a trap was prepared for him according to a civil case in the Sofia City Court with presiding judge Alexey Trifonov and judge Raina Martynova, and with false arguments and others he was taken into custody, where an attempt was made to kill him. In just three days, due to attempts to kill him, he lost 15 kilograms.

This triggered a lot of stress. The stress of the criminal case followed – full of lawlessness. Radoslava Kacherilska and Kirimov from the Sofia District Court with president Alexander Angelov for a year and a half. Energetically affected – kidneys, stomach – anxiety, adrenal glands, spleen, pancreas – uncertainty, liver – anger, lungs. This is based on an order from the mafia and the mafia boss General Lyuben Gotsev, together with the then prime minister Boyko Borisov, at the time the prosecutor general Tsatsarov, judges from the Sofia City Court with chairman Alexei Trifonov, the Sofia Court of Appeal Doncheva, and chairman of the Supreme Court of Cassation Judge Lozan Panov, Momchil Dobrev to be killed on February 19, 2020, after Judge Raina Martinova prepared a court record from 60 minutes to 48 minutes with 17 manipulations of this record – complete falsification and fraud – and the inaction of the

prosecutor general Tsatsarov, Geshev and then Sarafov from taking measures because M. Dobrev protested for 35 days because of the mafia in court, prosecutor’s office, state.

After November 2021, when reflux is triggered, sore throat – burning throat from acid reflux, hiccups. This process continues until February 2022.

The process of burning the throat from the acids that come from the stomach continues until February. We know that the cells that make up the esophagus are finer and more fragile than the cells that make up the stomach.

The human digestive system represents one single energy-information organ system, like other systems of human physiology. It has a separate energy and spectrum from the rest of the human physiological systems.

Continued reflux and the acids coming from the stomach, which burns the esophagus and changes it – in one part it becomes wider, in another narrower – cause the cells of the esophagus to burn, which are finer and more sensitive than the cells of the stomach.

From here, the autoimmune reaction of the digestive energy system is triggered, which starts to cause tumors to form in the mediastinum, to the thymus gland – tumors which start to press the esophagus, arteries, veins, muscles.

The ultimate goal is to cause a structure that will restrict acid access to the esophagus and burn it. Tumors arising in the mediastinum do exactly this.

An autoimmune disease is a condition in which the immune system is aggressive against its own organs and tissues. During this process, protein compounds appear – antibodies that selectively attack specific structures of our tissues and damage them or cause the growth of structures, which leads to a change in their function, disrupting it. At birth, a person’s body has certain basic settings to combat multiple infections that surround us. There is innate immunity and acquired immunity.

When our system comes into contact with various bacteria, viruses, and other infection-causing structures, our immunity is trained to fight them precisely and purposefully. Both innate and acquired immunity have two bases: humoral and cellular level.

The purpose of the autoimmune reaction of the digestive system – as energy and information – is to prevent acids coming from the stomach from reaching the esophagus and stripping the cells of the esophagus and burning it further.

This goal is accompanied by the formation of tumors and tumor groups of cells in the mediastinum near the thymus gland.

In June 2022 followed a process of melting of part of these tumors which are located in the mediastinum, which in the process of melting as a natural reaction enter the lymph system, from where one lymph node on the right below the collarbone starts to grow rapidly with pain, which proves that already caused classic Hodgkin's lymphoma.

Rof's syndrome of Momchil Dobrev and Prof. Mariola Garibova-Dobreva is the connected process of the continuous unprovoked mucus generation from the different places of the digestive system – stomach.

Преходът от едно измерение на следващото измерение става след точно определено по време завъртане в точно определена посока на 90 градуса завъртане и повдигане на следващото хармонично ниво на честотната сфера на предишното измерение. Всяко измерение притежава съзнание, което резонира на съответните хармонични нива и спектри и честотна сфера.

Съзнанието на човека може да се издигне от едно ниво-измерение на друго, след интерференция на звуковите спектри и съответната честотна сфера на съответното измерение.

Съзнанието се движи със скорост много по-голяма от скоростта на светлината. Съзнанието се движи мигновенно.

Съзнанието може да получава информация и да вижда всеки обект в дълбочина и до неговата структура. Съзнанието има и съответни осезаеми органи.

Тези изводи се доказват от експериментите, проведени от лорд проф. Момчил Добрев още от 1985 в Германия, след това 1991 до 2003 с точно определени техники и процедури, изчистени и създадени от лорд проф. Момчил Добрев.

Всичко това се поддържа от етера – неговата полевая структура, която има геометрична структура.

За целта лорд проф. Момчил Добрев още 1991 създава нова метрика, нова топология, която почива на принципите на природата – златното сечение, редицата на Фиbonacci, фракталната структура, холографско включване на информацията.

В основата на фракталната структура е структурата на спиралата на Фиbonacci и логаритмичната крива. Основен принцип – причина за движението във вселената е това, че редицата на Фиbonacci – която е със съответната спирала – се движи ускорително. Самите числа 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89 и т.н. доказват ускорението на това движение.

4/. Theory and practice of consciousness – types, degrees, levels, topology, metrics – the experimental experiments of M. Dobrev.

4.1./ Theory of the 16-dimensional structure of matter – the consciousness of Prof. Momchil Dobrev, an integral part of the 16-dimensional dimension of the field of the universe – 2003, and the experiments of Lord Prof. Momchil Dobrev from 1985, 1991–2003 with the levels of consciousness and the raising of the eighth level of consciousness and opening of a portal for travel of consciousness in the universe with a speed – instantaneous, that is, much greater than the speed of light – the real denial of Einstein and dialectical materialism. The explanation of dark energy and dark matter.

The ether – field structure of the field which has a precisely defined geometry and contains consciousness at the zero point.

Theory of the universe by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva – 2005 as a general description of life in space and the universe, which encompasses physics, biology, chemistry, genetics, psychology, psychiatry and others.

Theory of the universe by Prof. Momchil Dobrev and Mariola Garibova-Dobreva is based on the model and equations of Momchil Dobrev since 1985–1991, with which the following basic postulates and theory of species and levels of consciousness in the universe (1991) by Lord Prof. Momchil Dobrev are defined:

- The universe consists of a multidimensional universe which consists of 16 levels of dimension, which includes parallel universes, the essence of which will not be discussed here.
- Each dimension represents a frequency sphere of density – a matrix, in which the dimension is based and rests.
- Each higher level of dimension is supported by a precisely defined frequency sphere, which is harmonic and several degrees higher than the previous dimension.
- Every advancement of matter and field matter of any being in this dimension is invisible for the previous dimension and is then invisible when it itself resonates on this frequency sphere.
- The transition from one dimension to the next dimension occurs after a precisely defined rotation in a precisely defined direction of 90 degrees rotation and raising to the next harmonic level of the frequency sphere of the previous dimension.
- Each dimension has a consciousness that resonates on the corresponding harmonic levels, spectra and frequency sphere.
- Human consciousness can rise from one level-dimension to another after interference of the sound

spectra and the corresponding frequency sphere of the corresponding dimension. Consciousness moves at a speed much greater than the speed of light. Consciousness moves instantaneously.

- Consciousness can receive information and see every object in depth and to its structure. Consciousness also has corresponding tentative organs.
- These conclusions are proven by the experiments conducted by Lord Prof. Momchil Dobrev since 1985 in Germany, then from 1991 to 2003 with precisely defined techniques and procedures refined and created by Lord Prof. Momchil Dobrev.

All this is supported by the ether – its field structure, which has a geometric structure.

For this purpose, Lord Prof. Momchil Dobrev as early as 1991 created a new metrics and a new topology, which is based on the principles of nature – the golden cross-section, the Fibonacci series, the fractal structure, holographic inclusion of information.

At the base of the fractal structure is the structure of the Fibonacci spiral and the logarithmic curve. The basic principle – the reason for the motion in the universe – is that the Fibonacci series, which is its corresponding spiral, moves acceleratedly. The pure numbers 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, etc. prove the acceleration of this movement.

4.2/. In 1991–2003, Lord Prof. Momchil Dobrev created a theory of the structure of consciousness as an energy information system in the universe that formed matter.

Based on experiments conducted systematically since 1985 in Germany, then from 1991 in Bulgaria and until 2003, Lord Prof. Momchil Dobrev created his theory of the structure and levels of consciousness as part of the universe.

This is a structure that consists of 13 levels, with only 12 levels being accessible to human souls.

As the dimensions of the universe field in the universe are 16, so each dimension has consciousness. This is an information structure that works on a matrix principle – fractal, holographic.

The movement along the path of consciousness from the third level of consciousness, which is a person's, up the height to 16, does not happen in the same way.

Each level of consciousness exists in a specific sound harmonic coherent matrix, and it has precisely defined frequency harmonic coherent characteristics that are harmonious at the lower level.

The structure of the consciousness field consists of:

- Levels of consciousness. In reality, there are 13 levels of consciousness, with 12 levels accessible to souls.
- Basic channel, through which there is a transition from one level of consciousness to another next level of consciousness.
- Rules for transition from one level of consciousness to another level of consciousness.
- Each level of consciousness has a sound matrix that defines it.

In the presence of a sound complex that encompasses the sound matrix characteristics of each of the levels of consciousness, and they are combined harmonically one into another, one can move from one level of consciousness to another level of consciousness.

If the harmonic sound matrices of two or three levels of consciousness are contained, then the consciousness of an individual can pass through these levels and stop at the last one whose sound matrix corresponds to the last level.

Each level of consciousness has there also their corresponding sensory organs.

Law – with the thought of man, the consciousness is governed where to move in the universe.

With these experiments from 1985 in Germany to 2003 inclusive, the consciousness of Lord Prof. Momchil Dobrev raises to the eighth level of consciousness and through thought is governed in the universe.

If the movement is towards the universe, then the consciousness starts to move in the direction determined by the thought.

Experimental procedure for opening a portal of consciousness through which the consciousness can see every object in the universe – from the smallest level to the largest level.

i. Initially, with eyes closed, the person imagines a ball of fire above his head. With thought, he begins to move this ball from his crown to the first chakra and back. At one point, he speeds up with thought the process of movement of this fiery ball from the seventh to the first chakra and back. We are talking about the main seven chakras in the human body, although there are many more.

With thought, this movement of the fiery ball is allowed to move from top to bottom and back.

ii. Depending on the polarity, which is different in men and women, mentally at the level of the seven main

chakras in the human body, with the power of thought, solar discs are created that rotate in a certain direction.

Depending on the polarity, respectively, discs 1, 3, 5, 7 rotate to the left, while the others 2, 4, 6 rotate to the right.

And respectively, 1, 3, 5, 7 rotate to the right, and the other 2, 4, 6 rotate to the left.

When listening to a precisely specific sequence of sounds that correspond to and cover all frequency sound characteristics-matrices of each of the levels of consciousness through the channel of consciousness, the eighth level of consciousness is reached without problems, after the procedure with the light ball and the rotation of the corresponding solar disks 1, 3, 5, 7 in one direction and 2, 4, 6 in the other direction is done.

This movement accelerates the process of coherence and synchronization.

iii. At the next moment, a beam of light is released from the first to the seventh chakra or the ball of light from 1/. A point from the first to the seventh chakra, and upon reaching the seventh chakra, with the power of thought this beam is directed at 45 degrees to the visual screen. This is the visual field of consciousness.

Since the visual field of consciousness is at 45 degrees to the thought and the golden ball is tilted at a 45-degree angle to the horizontal plane between the eyes, at 45 degrees is the visual screen of the person and the visual screen of his consciousness.

All this time, around the person who has his eyes closed, music is flowing that contains the harmonic frequencies of the third dimension, the fourth dimension and the fifth dimension.

With the corresponding sound vibration and harmony of the frequencies of levels 3 to 8 in music, the eighth level of consciousness is reached.

From the sixth to the eighth level of density, and corresponding to consciousness, is the carrier of "dark energy" for current physicists.

There is a synchronization and harmonization of the sound waves with the action of the golden ball and its movement.

Then, after the ball is directed at 45 degrees to the visual screen of consciousness, with thought the person says exactly as he wants to see or feel.

Immediately after "letting go" of the thought, at that exact moment of the golden sphere, with the corresponding energy and frequency coming out before

the "eyes" of the consciousness, is the object which is desirable to be seen by the person.

According to the theory of the structure of consciousness, the following conclusions follow:

i/. Materialization of thought forms occurs between the sixth and eighth levels of consciousness.

Such healers as Sai Baba and other healers had access to the sixth level of consciousness, when only at the thought of the illness of the person who was opposite them, a powder substrate materialized in the hand, which Sai Baba gave to the sick person, after which the healing of the patient followed.

From the sixth to eighth levels of consciousness, there are possibilities for materialization of every thought. Naturally, the object of thought is controlled.

At these levels, materialization happens especially at the sixth level of bad thought forms, while materialization of good thought forms occurs from the sixth to the eighth levels of consciousness.

The eighth level of consciousness is located correspondingly in the harmonic of the corresponding harmonic matrices of these levels of energy chakras, which are harmonious to the main seven chakras in the third dimension of man.

Thought can direct consciousness not only to the structure of a galaxy or a star, but also to a microworld. Through thought, consciousness transits instantly to where it wants to be.

This is possible only and based on the fractal structure of the universe and the capabilities of consciousness to move instantly in the corresponding structure – microstructure, megastructure or other.

The experiments of Lord Prof. Momchil Dobrev. Using these rules, Lord Prof. Momchil Dobrev opened the correct channel-portal, which any person can open to the universe and see what he wants to see, even if it is billions of light years away.

The experiments of Lord Prof. Momchil Dobrev are repeatable and give the same result.

Naturally, during this procedure, noise or shouting in the environment should not be allowed. This will disturb the movement in the channel – portals will return the person immediately to his physical body.

On the basis of the Cosmological Information Theory and Vortex Theory, Mariola Garibova and Momchil Dobrev elaborated in 2005 the Theory of Universum.

These experiments prove that consciousness moves at a speed of immediately – that this speed is much greater than the speed of light.

The model of consciousness – levels, degrees, types, topology, metrics.

In 1991, Lord Prof. Momchil Dobrev conducted a series of the following experiments.

In this whole process, there is music that combines the harmonic frequencies – the spectrum of the third dimension – of the fourth and fifth dimensions.

Postulates that follow from these experiments:

Consciousness moves at a speed much greater than the speed of light – instantly, because consciousness has a fractal-holographic structure with basic characteristics – the Fibonacci series and the golden section. The information in one point is contained in every point of the universe.

Consciousness can go anywhere at any time, directed by the thought of man. Thought is the one that directs consciousness.

There are 13 levels of consciousness, with the soul having access to only 12 levels of consciousness.

By accessing these levels of consciousness, the person concerned has the opportunity to:

At the sixth level – materialization of thought, of intention, of desire, be it to cure a specific person or something else.

Sai Baba had access to the sixth level of consciousness, where through his thought he materialized his desire, a prayer to cure the person concerned, and then received materialized dust in his hand.

The experiments of Lord Prof. Momchil Dobrev from 1985–1991, and public experiments 2016–2017 in front of hundreds of people.

The movement along the path of consciousness from the third level of consciousness, which is the human being, up the height to 16, does not happen in the same way.

Each level of consciousness exists in a certain sound matrix, and it has precisely defined frequency characteristics.

The structure of the field of consciousness consists of:

- Levels of consciousness
- A basic channel, through which there is a transition from one level of consciousness to another next level of consciousness.

Rules for transitioning from one level of consciousness to another level of consciousness:

Each level of consciousness has a sound matrix that defines it.

In the presence of a sound complex that encompasses the sound matrix characteristics of each of the levels of consciousness, and they are combined harmonically one into another, one can move from one level of consciousness to another level of consciousness.

If the harmonic sound matrices of two or three levels of consciousness are contained, then the consciousness of the individual can pass through these levels and stop at the last one whose sound matrix corresponds to the last level.

Each level of consciousness has there also their corresponding sensory organs.

Law – with the thought of man, consciousness is governed where to move in the universe.

With these experiments from 1985 in Germany to 2003 inclusive, the consciousness of Lord Prof. Momchil Dobrev raises to the eighth level of consciousness and through thought is governed in the universe.

If the movement is towards the universe, the consciousness begins to move in the direction determined by thought.

Procedure for ascending to the eighth level of consciousness:

ii. Depending on the polarity, which is different in men and women, mentally at the level of the seven main chakras in the human body, with the power of thought, solar discs are created that rotate in a certain direction.

Depending on the polarity, respectively, discs 1, 3, 5, 7 rotate to the left, while the others 2, 4, 6 rotate to the right.

And respectively, 1, 3, 5, 7 rotate to the right and the others 2, 4, 6 rotate to the left.

A ray of light is mentally projected from the first to the seventh chakra or a ball of light from the first to the seventh chakra and upon reaching the seventh chakra, since the visual field of consciousness is at 45 degrees, the thought and the golden ball are drawn at a 45 degree angle to the horizontal plane between the eyes.

At 45 degrees is the visual screen of the man and the visual screen of his consciousness.

With the corresponding sound vibration and harmony of the frequencies of the levels from 3 to 8 in music, the eighth level of consciousness is reached.

The eighth level of density and corresponding to consciousness is the carrier of “dark energy” for current physicists.

ii. This procedure is so “complicated” because the information about our consciousness at the DNA level is limited and does not contain the possibility of raising the channel of consciousness levels quickly and easily.

The eighth level of consciousness is located correspondingly in the harmonic of the corresponding harmonic matrices of these levels of energy chakras which are harmonious to the main seven chakras in the third dimension of a person.

Thought can direct consciousness not only to the structure galaxy, star, but also to the microworld. Through thought consciousness passes in a second where it wants to be.

This is possible only and based on the fractal structure of the universe and the possibilities of consciousness to move instantly in the corresponding structure – microstructure, megastructure or other.

The experiments of Lord Prof. Momchil Dobrev:

Using these rules, Lord Prof. Momchil Dobrev passed from the third level of consciousness through such superimposed harmonic sound matrices on five levels and reached the eighth level of consciousness.

The eighth level of consciousness:

This happens in the presence of a harmonic.

When listening to a precisely specific sequence of sounds that correspond to and cover all frequency sound characteristics-matrixes of each of the levels of consciousness through the channel of consciousness, the eighth level of consciousness is reached without problems, after the procedure with the light ball and the rotation of the corresponding solar disks 1, 3, 5, 7 in one direction and 2, 4, 6 in the other direction is done.

On the basis of the Cosmological Information Theory and Vortex Theory Theory, Mariola Garbova and Momchil Dobrev elaborate in 2005 the Theory of Universum.

In 2016, at an event – a lecture with more than 70 people, Lord Prof. Momchil Dobrev showed the system and how to reach the eighth level of consciousness and what can be done there at this level.

5/. Stepping on his theories, Lord Prof. Dr. Momchil Dobrev, with the help of Prof. Mariola Garibova, in 2005 they both developed the “Theory of Universum” and related equipment and made research based on the fact that the chakras of the person, which are energy centers, are double whirlwinds that work in a specific way.

The results are undisputed and prove a new age of medicine in the treatment of human diseases – both physically and mentally – holistically – based on the energy of the human being.

5.1. Basics of the cosmological theory of information and vortex field theory of Momchil Dobrev Dobrev

In 1991, Momchil Dobrev creates the Cosmological Theory of Information (Dobrev, 2009) and the Theory of Vortex Fields (Dobrev, 2012) – the basis of everything. In the same year, Momchil Dobrev created two free energy generators using the theoretical and practical solutions of both theories, creating prototypes, but actually refusing to start regular production because he knows that all scientists and inventors who create such generators soon after are killed.

The real vortex theory proves the existence of swirling fields in the fabrication of matter at the lowest to the highest level, starting from the atomic structure to the construction of star systems and galactic systems of the universe. On the other hand, the vortex fields are also present in the construction and functioning of the human body.

On the other hand, the cosmological theory of information proves that vibrations are the basis of the existence of all objects in the universe and man in particular. Even at the cellular level there are precisely defined vibrations of precisely defined frequencies and frequency spheres. Each cell, even every organ, vibrates with exactly the same frequency when it is in a state of health and certain other ones when it is in a disease state. The deviation from the interval norm of the “healthy” body vibrations proves the opposite – that the body is sick.

Swirl fields actually carry, distribute, and create both information and energy. There is actually a conversion of information into energy and vice versa. In fact, on the basis of the theory of the vortex fields, the passage of the material in the process of materialization and dematerialization is undisputed, in which the processes do not lose the information. On the other hand, the vortex fields are the basis of matter and antimatter. Swirl fields emit vibrations precisely defined and at specified intervals.

This is the relationship of the vortex fields with the cosmological information theory.

Three distinct principles apply to each swirling system:

There is a force that is at the heart of the whirlwind – in its center – and it controls the entire structure.

For each structure, there are swirling forces that cause the structure to strive for center, swirling forces that cause the structure to strive for external propagation, and a

separate force that prevents objects from the structure from leaving the structure itself – that is, it has the force of limiting the size of the structure.

Vortex structures are also hurricanes. In the center of hurricanes is peace.

There are chakras in the human body both at the physical level and at the other two levels, which besides supplying information and energy to the respective glands and organs at these levels, also raise the energy to the highest level.

The whirling structure radiates the corresponding vibration – its section.

Light is a vortex.

Each electromagnetic wave is a whirl, the point at which both the electric field and the magnetic field are the zero point.

Moreover, the space generating the vortices is geometrically based on the golden section, the numbers phi and pi.

As a consequence of the cosmological theory of information are the pyramids, among which the pyramid of the Hypo. This geometric figure represents a field generator in which antigravitation, materialization, and dematerialisation processes are generated at the respective height points with corresponding coaxial frequency generation or so-called vibration. At the corresponding point of this geometric structure, a precise vibration makes a connection with the spiritual world. The geometric structure itself generates a field structure with specific properties and qualities. At specific points in the structure of the pyramids where there are golden coincidences, there is no process of rotting, there is dehydration, and a process of energy influence even on metallic objects. Apart from that, these pyramids actually create field structures to balance the energy field of the Earth.

Electromagnetic wave is a whirlwind in a straight line.

A basic element in the cosmological theory of information is also to note the basic principle.

When an “entrance door” has a precise vibration, to enter this door it must generate the same vibration frequency spectrum as the corresponding door. This applies to each cell, for each process, for each object. Only when the frequency spectrum of the “front door” and the object or the information that can and wants to go through this “door” match, the energy and the in-house information can enter through the “front door”. In the event of interference, the entry through the “entrance door” occurs.

Each number, each letter, radiates a certain frequency spectrum. Every word does the same. Here the coincidence is enormous. : is a sacred number that corresponds

In 2006, Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva discovered the theory of energy-information medicine, energy-information genetics, energy-information psychology, energy-information psychiatry.

The main element of this new type of medicine is the one discovered in 2006 – the comprehensive 13-level causal network energy-information diagnostic system.

Stepping on his theories, Lord Prof. Dr. Momchil Dobrev, with the help of Prof. Mariola Garibova, in 2005 they both developed the “theory of universum” and related equipment and made research based on the fact that the chakras of the person, which are the energy centers, are double whirlwinds that work in a specific way.

The results are undisputed and prove a new jade of medicine in the treatment of human diseases – both physically and mentally – holistically – based on the energy of the human being.

6/. Comprehensive 13-level causal network multilevel energy-information diagnostic system developed by Prince Prof. Momchil Dobrev and Princess Prof. Mariola Garibova-Dobreva in 2006 – brief description

Here we will briefly describe the “complex causal network multilevel energy information diagnostics” developed in 2008 by Prince Prof. Momchil Dobrev and Princess Prof. Marola Garibova-Dobreva. It provides a complex option for discussing any symptoms and gives the best solutions for diagnosis and corresponding treatment, which benefits both modern medicine and the practices of Chinese, Tibetan, Indian and other healing practices.

It is complex and allows for correction in diagnosis and taking into account various factors, as you will understand yourself in the short description.

Based on this complex causal network multilevel energy-information diagnostics and based on a direct example of a case that developed from November 2021 to September 2022 and found its foundations even before that, from February 2020 until now, the syndrome of Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva, the system of triggering an autoimmune response, as well as one of the causes of Hodgkin’s lymphoma.

In practice, we have become convinced that every doctor profiled in a specific field of medicine and human health and treatment only understands his field, not being

interested in diseases, causes and others that can cause a disease.

It is difficult to find a complex doctor who can examine a disease from all sides, directions.

It is also difficult to find contact between traditional medicine and that of China, India, Tibet and other thousand-year-old practices.

This system is also the basis of the one developed by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva – energy-informational medicine, energy-informational medicine, genetics, energy-informational psychology, energy-informational psychiatry.

Here I briefly describe this complex causal network multi-level energy-information system of diagnostics.

This one.

i. First level – level of symptoms / time

ii. Second level – plane of medical research / time – red and other indicators, In this level, red indicators are placed on the various time studies, which give directions for further consideration.

iii. Third level – a plane of food that is used, used over the years by the patient ten years ago, and more so now. Energy-informational values of the food used by the relevant person, compatibilities – energy-informational.

iv. Quaternary – level of social status, life, environment – events / time, In this plane are described temporally specific events, personal, in relationships between people, events that happened, negative events, positive events, crises, relationships, conflicts, different levels of social relationships in family, society and others.

v. Fifth level – level of mental – stress – measuring the level of stress in the body along the energy channels, stress channels, stress from the external environment, from the internal environment – self-stress, thoughts, environment – relatives, home, neighbors, workplace and others.

In dependence on energy – is there an excess or deficiency in the energy system – chakras, meridians and others.

With an excess of energy (for example, with the chakras):

- First chakra – inertia, laziness, monotony, hoarding, materialism, greed, desire to control everything, fear of failure
- Second chakra – increased emotionality, sex addiction, clingy attachments

- Third chakra – dominance overpowered, dissipation, aggressiveness, constant activity, frequent emotional outbursts
- Fourth chakra – dependence, possessiveness, jealousy, lack of love, lack of discernment
- Fifth chakra – talk too much as tsashchita, inability to listen, excessive wastefulness, stuttering, idleness, dominating conversation
- Sixth chakra – headaches, nightmares, hallucinations, delusions, difficulty concentrating, hyperactivity, distracted, nightmares
- Seventh chakra – over-intellectualism, dissociations

In case of lack of energy (for example, in the chakras):

- First chakra – fear, lack of discipline, anxiety, low weight, depression, insecurity, fatigue, financial problems
- Second chakra – rigidity, frigidity, impotence, emotional numbness, pleasure pain, fear of change, lack of desire, lack of passion
- Third chakra – weak will, low self-esteem, passivity, laziness, cowardice, lack of creativity, indigestion, lack of energy, passive, unreliable, victimizer, blames others
- Fourth chakra – shyness, loneliness, lack of self-esteem, spitefulness, rude, emotionally unavailable, hopeless, antisocial, withdrawn, withdrawn, critical, judgmental, intolerant, loneliness, narcissism, fear of relationships
- Fifth chakra – difficulty speaking, aphasia, fear of communication, anxiety, isolation, sore throat, deep voice, introverted, shy
- Happy chakra – insensitivity, poor memory, poor vision, inability to think in an alternative way, complete denial, lack of clear thought, vision problems
- Seventh chakra – learning difficulties, spiritual skepticism, limiting beliefs, materialism, apathy

Imbalance (for example, with the chakras):

- First chakra – anemia, fatigue, constipation, lower back pain, sciatica, depression, poor circulation, colds, cold hands, feet and nose
- Second chakra – eating disorder, alcohol abuse, drugs, depression, lower back pain, allergies, yeast infections, urinary problems, intolerance, dulled senses, frigidity
- Third chakra – indigestion, problems with gallstones, diabetes, hypoglycemia, self-criticism, overestimation
- Fourth chakra – heart disease, breathing disorders, breast cancer, chest pain, high blood pressure, passivity, immune system problems, muscle tension

- Fifth chakra – thyroid diseases, sore throats, strep throat, laryngitis, stiff neck, shoulders, kissing, anxiety, nightmares, stuttering, fear of speaking
- Sixth chakra – cognitive impairment, coordination problems, sleep problems, hallucinations, poor concentration, weak ramet
- Seventh chakra – headache, confusion, mental illness, neuralgia, anxiety, rash, hyper-intellectualism, lack of faith, lack of conviction, spiritual cynicism, apathy, materialism, greed, dominance

Relation of chakras and organs to mental conditions:

- First chakra – fear
- Second chakra – guilt
- Third chakra – shame
- Fourth chakra – sadness
- Fifth chakra – lies
- Sixth chakra – illusion
- Seventh chakra – attachment

Correlations of glands and organs with corresponding mental states:

Brain / fear /, gall bladder / impatience /, adrenal gland / regret /, thyroid gland / unspoken truths /, bile / malice /, liver / anger /, lungs / sadness /, colon / guilt /, stomach / anxiety /, spleen-pancreas / uncertainty /, heart / jealousy /, small intestine / sweaty emotions /, and time energized in a 24-hour cycle.

Mental traumas / reflection in each chakra – at the level of consciousness / subconscious /

vi. Sixth level – energy field plane

Measuring the energy of each organ, measuring the energy of tumors, formations, pathologies, anomalies, measuring the energy of a medicine, whether it is in sync or interference with a given disease, whether the medicine is useful for a certain condition, pathology, and others.

Analysis of the flow of energies along the energy meridians concerning the relevant organs and systems. Analysis of the “yin” and “yang” energies that pass through the relevant organ or system and in the systems around the diseased organ or place, research of energy and the flow of energies in the relevant meridians.

Analysis of the flow of “vital energy”, the cycle that passes through the relevant organ depending on the five primary elements and

“Zang” organs:

Heart meridian,
Liver meridian,

Spleen-pancreas meridian,
Lung meridian,
Kidney meridian,
Pericardial meridian

And

“Fu” organs:
Small intestine meridian,
Gall bladder meridian,
Stomach meridian,
Colon meridian,
Bladder meridian,
Meridian of the three lights

And specifying the diseased organ or system to which system it belongs. Anatomo-pathophysiological principles and bases of pain depending on the energy channels of the chakras, meridians and organs, the functions of the meridians and the pathological syndromes related to them and, accordingly, specifically to the diseased organ, system.

Energy level – chakras – endocrine glands, regulation of corresponding body areas – spine, kidneys, reproductive system, liver, gall bladder, kidneys, tevrna seta and digestive system, stomach, heart, blood, circulatory system, bronchial system, white lungs, speech apparatus, lower part of the brain, left eye, ears, nose, nervous system, upper part of the brain, right eye.

Chakras – trauma and abuse.

Chakras – characteristics of excess energy.

Chakras – characteristics of lack of energy.

Symptoms of dysbalance.

A balanced state.

Ways of balancing.

Food.

Crystals, essential oils, herbs.

Affirmations – mental.

Measurement and information of Analysis and measurement of the energy-informational fields from the outside – this includes all kinds of fields – human, energy-informational fields of the environment, energy-informational fields of the environment of the dwelling where one lives.

- The human energy-informational fields
- The energy-information fields of the food you consume
- The energy-information relationships between people, the energy fields of all participants
- The thoughts of the person himself – which represent an energy-informational field – way of thinking, character, temperament, and others

- The thoughts of other people – which represent energy-informational fields that are in relation to the patient
- The energy-informational field of the Earth and its influence in the relevant area
- Hereditary information – energy – information of the patient
- Energy-information fields of the environment
- The current and tested energy-information state at the cellular, organ, functional, physiological level
- The energy-informational state of the entire human organism is up-to-date and tested during relevant periods
- Long-term energy-information fields-models – epigenetics
- Energy-informational perception from the outside world and information to the brain and its associated limbic system
- From the information-energy structure of stress, fear, apprehension, sadness, anger or other emotional blockages
- The energy-informational structure of past experiences
- Energy-information blockages
- Energetic-informational unconscious impressions – alarm reactions
- Thoughts / brain / consciousness – information field – physical matter
- Information field – to brain – physical matter

vii. Seventh level – energy level plane – spiritual level, subconscious level, conscious level

viii. Eighth level – acidity / alkalinity of the body and levels. Acidity of the relevant physiological systems of the body, acidity of organs, tissues.

Energy-information essence of acidity and its influence on the relevant organs and functional physiological systems.

ix. Ninth level – level of information measurement, analysis of the flow of information and energies, presence of energy blockages, information blockages.

Blockages represent an accumulation of negative energy, which at some point after reaching a given threshold of negative energy accumulation want to generate corresponding matter.

x. Tenth level of physiological functioning

xi/. Tenth level of medicinal – therapeutic

xii/. Tenth plane causally

xiii/. Tenth level diagnosis / operative treatment

The following rules and possible operations are available in a 13-level diagnostic system:

- There are handles between the corresponding planes
- There are red dots – important points
- Causal relationships are present
- Direct and reverse links available
- A process of ascent from a lower level to a higher level when there are positive constellations
- Process of descending from a higher level to a lower level when there are negative constellations, prohibitions, problems
- There are connections, causal relationships between different levels
- There are dependencies, lines, reverse in time between different planes
- All levels are time-bound and are considered in the corresponding time of appearance, of presence, of fact and develop in the corresponding time, period

The diagnosis of a disease is of great importance for the treatment of the respective disease.

7/. Some basic postulates of Prince Prof. Momchil Dobrev – Halachev's and Prof. Mariola Garibova-Dobreva's “Theory of the Universe”, “Theory of Energy-Information Genetics, Energy-Information Medicine, Psychology”, based on which Prof. Momchil Dobrev won the 2021 World Championship in Fundamental Physics and Prince Prof. Momchil Dobrev and Princess Prof. Mariola Garibova-Dobreva won the 2022 World Championship in Genetics.

In this paper are described studies of the team of Prince Prof. Momchil Dobrev and Princess Prof. Mariola Garibova proving the truth about depression as a mental disorder based on the Theory of the Universum developed by Prof. Mariola Garibova and Prof. Lord Momchil Dobrev-Halachev in 2005, basics of the cosmological theory of information and vortex field theory developed by Lord Prof. Momchil Dobrev – basic structure of the universe.

In 2006, both Prince Lord Prof. Momchil Dobrev and Princess Lady Prof. Mariola Garibova-Dobreva developed energy-information medicine, energy-information genetics, energy-information psychology.

Basic postulates following from theory of the universe, theory of vortex fields, energy-information medicine and genetics:

- Postulate number 1 – Each organ oscillates in a specific spectrum when it is in a healthy state. The

health spectrum is a specific interval. When this organ radiates outside this interval, the organ is sick. Every pathogen, bacteria, virus emits a specific frequency spectrum.

- Postulate number 2 – In the human energy-information system there are frequencies that regenerate human DNA and every organ.
- Postulate number 3 – Each organ has a frequency of regeneration of its cells.
- Postulate number 4 – Organ regeneration is carried out by modulation of the basic frequency regenerating DNA.
- Postulate number 5 – Treatment of pathogens through interference.
- Postulate number 6 – Information code is a matrix emitted continuously by every living object.
- Postulate number 7 – The information code is read counterclockwise in a vortex way.
- Postulate number 8 – Treatment can be done by interference or by information code transmission.
- Postulate number 9 – Distribution of particles is performed through wave-particle duality.
- Postulate number 10 – Light propagates via a vortex path.
- Postulate number 11 – Vortex fields exist based on ether spatial structure.
- Postulate number 12 – Each vortex spectrum contains mandala-based information.
- Postulate number 13 – Energy and information propagate only through vortex movements.
- Postulate number 14 – Vibrations are the basis of all existence, and vortex structure governs information, DNA reading, and universal formation.

Hurricanes are vortex structures. At the center of hurricanes is peace – energy at zero point.

8/. Theory of the 16-dimensional structure of consciousness by Prof. Momchil Dobrev, integral part of the universe field.

- Ether – field structure of the field.
- Theory of the universe by Prof. Momchil Dobrev and Prof. Mariola Garibova-Dobreva – 2005.
- The universe consists of 16 dimensions, each with consciousness and a defined frequency sphere.

- Consciousness moves at a speed much greater than the speed of light.
- Ether is a conscious field structure connecting all matter, energy, and consciousness.
- In 2003, Lord Prof. Momchil Dobrev created the theory of consciousness as an energy-information system.
- This structure consists of 16 levels, fractal and holographic.

9/. CONCLUSIONS

Disease originates at a specific level of consciousness and later materializes in the physical body. This applies to autoimmune diseases, Hodgkin's syndrome, and others.
